FOOT-POWER MACHINERY.

Machines for ripping, cutting, cross-sawing, mortising and
planing, forming of a groove, gaining, rabbeting, cutting
gables, and turning. Builders use our Hand Circular Rip Saw for
the greater portion of their ripping in preference to cutting their
timber to a mill five minute's drive from their shops. The same
is true in regard to scoll sawing, mortising, tenoning, cutting stuff
for drawers, boxes, etc. Builders using these machines can bid
lower and save more money from their contractors than by any
other means.

Have the Following Letters from Builders:

CLARENCE F. LEE, carpenter and builder, Merristown, N. J., says: "I have had one of your
Hand Circular Rip-Saws for about three months, and am much pleased with it. I have done the
ripping for 15 houses in that time, which is over forty miles through lock boards. I have ripped
as high as 3-inch plank. Table is also good for rabbeting; having rabboted all joints
and saved all chips for 200 windows."

ALEX. BRIDGES, Lima Ohio, says: "A few days since we had some 180 small drawers
to make for a drug store; the steam power mill wanted 50 cents each for making them.
With my foot-power machinery I made them, and saved above good wages on the job.
If desired, these machines will be sold ON TRIAL.
The purchaser can have ample time to test them in his own shop and on the work
before he decides them to do. Descriptive Catalogues and Price List Free.
