

Summary Statement of Mining Field Class 1921

Mond Nickel Co. Conniston, Ont.

My party visited both mines and smelter. The General Manager and the majority of his technical staff are McGill Mining graduates who understand and sympathise with my method of class work. We have visited their properties nearly every year and are always treated with the utmost kindness.

Gen. Mngr. C.V. Corless, Conniston Ont. ✓
Chief Metallurgist, J.F. Robertson Conniston Ont. ✓
Mining Engineer, Oliver Hall

International Nickel Co. Sudbury, Ont.

This Company is the chief producer of nickel ore and metallic nickel in the world. One day was spent visiting the Creighton and Copper Cliff mine and smelter. This visit also is almost an annual occurrence as the mine lies on my ordinary route of travel.

Vice. Pres. J.L. Agnew, Copper Cliff, Ont. ✓

Oliver Mining Company, Ishpeming, Michigan.

This company which is the chief Iron Mining subsidiary of the U.S. Steel Trust has treated me very handsomely on several occasions and this year they were exceptionally generous not only in permitting my students to visit their properties, but in giving us the use of their Engineer's Office for work room, and of their bath rooms, locker rooms etc. for dressing before and after visiting the mines. One whole week was spent at their plants with very great profit.

Gen. Supt. Captain F.E. Keese, Ishpeming, Mich. ✓
Chief Engineer. H.T. Hulst, Ishpeming, Mich. ✓
Mine Captain. Captain Alfred Edwards.

Cleveland Cliffs Iron Mining Co. Ishpeming, Michigan.

This is the leading independent Iron Company of the U.S. and its most up to date mines are in Ishpeming and that district. It ordinarily refuses admission to its properties but the management made exception in our case, (possibly due to the fact that the Vice President and I are old acquaintances) The Management placed pretty well the whole technical staff at our disposal at one time or another during the visit and treated us on the whole very handsomely. We spent three days visiting their plants and went underground in their crack mine.

Vice. Pres. & Gen. Mngr. M.M. Duncan, Ishpeming, Mich. ✓
Assist. Gen. Supt. S.R. Elliot.
Assist. Supt. Lucien Eaton.
Chief Engineer. J.E. Jopling. ✓
Mechanical Engineer. O.D. McClure.
Assist. Engineer. R.J. Chinneour
Electrical Engineer. F.C. Stanford
Assist. Engineer. R.K. Durland.
Assist. Engineer C.W. Nicholson
Assist. Engineer. A.W. Pinger.
