

OBSERVATION.

According to the remarks of the Japanese interpreters at Nangasaky, I have called the long flat island in the straits of Van Diemen (page 237) Jaconosima, and that to the S. W. of it, (page 238,) Tenegasima. But, in an original Japanese chart, in the possession of the Academy of Arts and Sciences, and in two others belonging to Counsellor Klaproth, the S. W. island is called Jaconosima, and the one to the N. E. Tenegasima. I have no hesitation in adopting the latter as the proper way of naming them, and have therefore done so in my chart.
