Having been found useful to the young person for whom the contribution was made, they are now given to the public, in the hope that they may be a source of instruction to others." The compilation, though professing to be only a collection of Tales or Narratives from the Scottish chronicles, will, nevertheless, be found to contain a general view of the general history of that country, from the period when it begins to possess general interest."

A distinction should be made between these volumes and the two volumes by the same author mentioned in the following notice, entitled "History of Scotland to its Union with England." The author says, in his advertisement to the latter, "The object and tenor of the two works are entirely different. In the *Tales* taken from Scottish history, the author, throwing into the shade, or rather, avoiding all that could embarrass the understanding or tire the attention of his juvenile reader, was desirous only to lay before him what was best adapted to interest his imagination, and, confining himself to facts, to postpone to a later period an investigation of the principles out of which those facts arose." "The *History* may, in some degree, supply to the reader of more advanced age truths with which he ought to be acquainted, not merely as relating to a small kingdom, but as forming a chapter in the general history of man."
