Two thousand dollars is to be raise to perpetuate the memory of the late Christopher Robinson, K.C. The idea of the bar committee, who have charge of the project, is to have a brass tablet at Osgoode Hall, and to found scholarships in connection with the Law Society. So far the members have con-

After a vigorous discussion on a proposal to amalgamate the various offi-ces affecting land titles in the county, it was decided to leave the matter to the trustees, to be taken up at the first meeting. Many members are op-posed to the proposition, while others think that a coalition of registry offices would be as far as it would be practicable to go at present.

equests Deputations Will Prefer to Both the Governments,

Sault Ste. Marie, Jan. 28 .- The wor erful silver discoveries of the Cobalt egion have created a world-wide attraction to Canada in general and New Ontario in particular, with the result that millions upon millions of dollars are being poured into the country by capitalists, prospectors and others eager to get a share of the good things going. Gratifying as this is to all Canadians, there is a danger of Cobalt being looked the country of the whole of ed upon as comprising the whole of New Ontario, whereas it is only a very small the enormously wealthy section. In the Algoma district the inhabitants have awakened to the fact that it is necessary to get a hustle on in order that the government and the people of Old Ontario should be made aware of the colossal resources that exist in that vast district in the way of minerals, oil, timber, water powers, natural harbors, waterways and fertile lands. To carry out this educational work, all the municipalities have formed themselves into a union, and are sending a monster delegation to Toronto to wait upon the provincial government to seek their aid in the development of these valuable

resources.

It should be remembered that New Ontario is over 700 miles in length and nearly 400 miles in width, and extends from the western boundary of Quebec to the eastern boundary of Manitoba, and from Lakes Huron and Superior on the south to James Bay and the Albany River on the north, is one of, if not the richest countries in the whole Dominion, and is inhabited by over 120,000 people.

Yet despite all its wealth, New Ontario claims that but poor assistance is given the district in return. The people of Algoma have been the first to form an organization to make known their most pressing needs, and they will make an appeal to the government and the legislature at an early date for hberal grants to aid them in building good roads and to build a house of refuge, where the poor and needy transient visitors can be accommodated, re-

sient visitors can be accommodated, restored to health and started out to earn an honest living once again.

Also will they seek the assistance of the government in removing many disadvantages, which they say they now suffer at the hands of great monopolists, who do just as they please regardless of the rights of the people. As an instance, at Massey, a great lumber company, who were given exceptional privileges, have monopolized the whole mouth of the Spanish River, so that navigation is impossible. Repeated attempts have been made by the townspeople to come to an amicable arrangement with this company for the use of ment with this company for the use of the river, so that boats may bring in Companies Will Hereafter Dispose of Products Individually.

Sarnia, Jan. 28.—The Dominion Salt Agency of London, Ont., which was organized two years ago, will be discontinued. The agency was composed of R. and J. Ransford of Chinton. The Canadian Salt Co., Limited, of Wind-Canadian Salt Co., Limited, of Wind-Canadian

and C.P.R. own large tracts of valuable land which they refuse to sell, whilst the three Indian reservations retard the three Indian reservations retard the progress of the district. Many other

similar instances could be quoted, but these will suffice. What is now wanted is that the prowhat is now wanted is that the provincial government should pay heed to the demands of New Ontario. They want a main highway from North Bay to the Soo for vehicular traffic, supplemented with a light railway running the whole distance. There are plenty of water powers in the district to generate the electricity necessary for its operation. It would aid in the development of the town to promote new industries, make it possible to have a good mail service, a trunk telephone, additional telegraph facilities and quicker and cheaper transportation.

When he left Cayuga yesterday, it was the chief topic of the town.

Mr. Kohler, who is a brother of the Liberal member for Holdingard in the Liberal member for Haldimand in the legislature, says he has known the Perkins family for a number of years, and that both have been always well thought of in the community
