

TO SUFFER FROM HEADACHES MAKES LIFE MISERABLE

Headaches seem to be habitual with many people. Some are seldom, if ever, free from it, suffering continually with the dull throbbings, the intense pain, sometimes in one part, sometimes in another, and then over the whole head, varying in its severity by the cause which brings it on.

The varieties of headache most common are sick or bilious headache, nervous headache, headache from constipation, debility or indigestion and periodical and spasmodic headache, and undoubtedly the cause must be removed before permanent relief can be had.

Burdock Blood Bitters, that has been on the market for over 40 years, removes the cause of the headache, and not only does this, but also restores the entire system to healthy action and buoyant vigor.

Miss Emily Smith, 204 Bellwoods avenue, Toronto, writes: "I cannot speak too highly of Burdock Blood Bitters. For two years I was greatly troubled with violent headaches, particularly in the morning. I tried everything to cure me until a friend recommended B. B. B. I tried it, and now I am completely cured."

FARMERS RESPONDED NOBLY TO CALL FOR GREAT PRODUCTION

Dr. Creelman Reviews Work Done During This Year.

MANY BIG PROBLEMS

Production of Vegetable Seeds Is of Vital Importance Now.

GUELPH, Dec. 4.—Important matters in connection with greater production of farm work in Ontario in general were discussed by Dr. G. Creelman, in his address at the luncheon of the directors of the Winter Fair today.

W. W. Ballantyne, president of the Winter Fair, was chairman.

Dr. Creelman congratulated the officers of the Winter Fair on the show this year, referring to the quantity and quality of the exhibits, which meant much to the farmers of Ontario, who were hard pressed in those times of great stress. He dealt with some of the big problems of the department of agriculture that have been trying to do during the past year on the farms of Ontario. Reference was made to the introduction of tractors on the farms at the expense of the Government, and this had been a great benefit to the farmers, enabling them to plow many thousands of acres which otherwise would not have been tilled.

The butter question had also been taken up with the dairymen of Ontario, and the result was to have a grade for their butter, and he incidentally remarked that there were many more products which should be graded. The Government had advanced the dairymen \$75,000, and the result was that the Ontario buttermakers were getting just as good prices as the Alberta buttermakers. The department had taken up the vegetable-growing campaign and a canning campaign, both of which were highly successful. The department was also making an accounting survey which would enable the intelligent farmer to proper information regarding the details of his own business, which for many years they have not been able to do.

Vegetable Seeds. The production of vegetable seeds was perhaps one of the most important things being taken up, the speaker declaring that if the war was to last a couple of years more there would be none available for European sowers. There had also been given a great stimulus to the question of poultry-raising, and the wool grading matter was taken up, the success of which was well known. The farmers responded nobly to the call, and much better prices had been obtained, practically 20 cents a pound better than in previous years, making \$40,000 more to be divided among the wool-growing farmers.

The Potato Situation. The potato question was dealt with, and he stated that it had been decided to cut down the number of kinds, if possible, to some two or three, and excellent results had been obtained. There were before them a number of different grades of potatoes. The proper care of potato seed was considered, and the eradication of disease is a matter which would soon become successful. In order to assist in this the government had within the past two weeks bought 1,000 bags of undiseased potatoes from New Brunswick, and these would be distributed in the spring.

The matter of providing more meat for the Allies was an important one, and steps had been taken to insure greater production of meat, which were short in Canada. The farmers had been asked to take on extra sows, and many had consented, and he thought good results would be obtained.

Thousands of Visitors. Many thousands of visitors from all parts of Ontario poured into the city today to attend the fair. They came by train and by auto, and this afternoon, and evening the big buildings were crowded.

There was not much doing in the arena this morning outside of the judging of the dairy bulls, which attracted quite a crowd of interested spectators. They were a fine lot, and the judges had a busy time selecting the winners.

In the class for Ayrshire senior bull calves first went to Humeshaugh Kate's Champion, owned by Alex. Hume of Campbellville. He also took second in the Humeshaugh class. Perfect Peter, owned by S. S. Turner of Springbank, owned by A. S. Turner of Springbank, was third.

STARTLING EVIDENCE IN TREASON CHARGE MAY FREE PRISONER

Hanselman Declares He Only Followed Out His Orders.

BRANTFORD, Dec. 4.—Rather startling evidence was sprung tonight in the police court in the charge of treason against E. L. Hanselman, local chiropractor, who has been making munitions at night, and is charged with treason in having tampered with shells. After all the evidence was in and the crown attorney had asked that the prisoner be committed for trial, the magistrate raised a question about a statement of the accused, that he had never done anything but what the foreman had told him.

As a result, the foreman was called, and his evidence may be the means of acquitting Hanselman, who, although born in Canada, is of German descent. Herbert Shaw, the foreman at Gould, Shapley & Muir Company, where Hanselman was employed, stated that, to a certain extent, the prisoner had authority to drill and plug a shell, if it had been centred too deep.

This took place in the early part of the shell manufacture, and, according to the foreman, he was acting under the superintendent and the work was done openly.

The comment was made by Magistrate Livingstone that the case would probably clean up the matter of shell inspection, and that it was apparent the foreman had been working in the interests of the company and not of the country, although he might have been doing it innocently. After Shaw's evidence had been taken, the magistrate said he would consider the case, and will give a finding Wednesday night.

Doctors Recommend BON-OPTO For the Eyes.

Physicians and eye specialists prescribe Bon-Opto as a safe home remedy in the treatment of eye trouble, and to strengthen eyesight. Sold under money refund guarantee by all druggists.

An Entirely Different Treatment —Not a Laxative

Victims of Constipation do not consider that they are subjects for the physician. They know that drug stores are full of laxatives, any one of which will give prompt bowel action. They take old fashioned purges and physics, in ignorance that in repeatedly relieving temporary constipation with violent purges, they are surely contracting the disease in its chronic form. The drug laxative is a muscular stimulus to the lower intestine which ends in a weakening, not strengthening, reaction.

Doctors know the Nujol treatment for constipation, and prescribe it. No harmful reaction can come from its use because it does not

stimulate the muscles, and the stomach and other absorbing tissues of the bowels do not take it in. Its action is merely to pass through the digestive tract, reaching the lower intestine and softening the contents. The result is regular, easy bowel movements. The longer Nujol is taken, the less it is required, because in releasing the bowel contents easily, it permits the muscular walls of the intestines to restore themselves to the natural strength required for their proper functioning.

Nujol is like no other medicine. Call for it by name, (pronounced as spelt). If the nearest druggist does not have it, the next nearest will.
