Dr. Cristion doesn't come advocating the use of cosmetics, but rather tries to show what a simple knowledge of the rules of health and an understanding of the body tissues will do to preserve and restore youth and

beauty.

"Why should we study beauty culture?" asked the speaker. "Because it is the duty of every woman to keep her outh and beauty. I believe so strongly n the duty of man and woman to keep

youth and beauty. I believe so strongly in the duty of man and woman to keep their physical health and beauty, that I believe that I sin against God when i neglect my hair and my teeth and my body. I believe that the body is a temple in which God lives and that I should make it as perfect a dwelling as possible. Women should not complaint if their husbands turn away from them to other women, who are beautifully groomed and cared for, when they themselves, who perhaps might be ten times more beautiful, are neglecting themselves. They should remember that it is their duty to keep attractive. Many men are lured away by scarlet faces, because their wives are of fault.

XI.VI .- Fred's Voice.

"Who is it, dear?" cooed Julie from the inner room, a speculative eye directed toward the telephone. "If it's Tom, or Dick, or Harry, you can say I'm out."

Without answering her, or waiting to consider what I was doing, I silpped the receiver back upon its hook, cutting the communicating party definitely off—or so I thought.

I couldn't bear to hear Fred's voice again!

"Going to miss me, eh? You naughty boy! Then why stay away so

cooling voice.

Then:

"Hello. Do come. I've heaps to tell you. What do you say? Someone with me? Sounded like Anne? Well, Anne is here."

A pause. I listened with a beating heart. If Fred should come—

"You don't think you can manage it? What? Going out of town? Business? Humph! I don't believe it!"

Another pause.

Then:

"Doid you say Montreal? Oh, you lucky creature! For how long? Huh?"

Julie was polsed about the telephone in an attitude of exaggerated interest.

"You'll stay as long as the funds hold out? But I thought you were broke—

the receiver back upon its hook, cutiting the communicating party definitely off—or so I thought.

I couldn't bear to hear Fred's voice again!

Oh, how surprised he'd be if only he knew that I was now in Julie's apartment!

"What on earth are you doing that for, Anne?" The French woman's tones were querulous.

"I—I think it was a wrong number," I stammered stupidly, avoiding Julie's gimlet eye.

"Well, you might have said so sooner, and not kept me on tenterhooks." She retired back to her room, and began unfastening her frock. Then:

"Come here a moment, Anne, and help me."

I rose to comply with her request. I was rather curious to see the interior of the bedroom.

negative, for Julie did not leave the inestrument.

But a sudden resolve came to me. I would speak to Fred. I would sift this hateful position of mine to the very bottom. I would demand an explanation—yes—even though Julie listened with curious, prying ears.

So I rose quickly, crossed the floor, and removed the receiver from her before she had time to realize what I was doing.

"Get up, Julie. I must speak to Fred for a moment."

To my surprise, the French woman made not the least objection. No doubt inquisitiveness had a large part in her compliance.

"All right, dear. Fred, here's Anne." She vacated her chair, and I sank down in it, the telephone upon my knee.

"That you, Anne?" Fred's smooth tones trickled oilily across the wires. I could almost see his smirk.

"Why didn't you keep your appointment with me? Why didn't you come for the fifteen hundred dollars, if for nothing else?" I managed to blurt out.

"Business prevented me," said Fred, precisely as I knew he would. "And now I've got to dash up to Montreal, and heaven only knows how long I'll be detained there. I'm terribly sorry, Anne."

His tones were lowered, so that Julie

Keep it? Lock the stable door, after the horse was stolen!

"Fred," I cried out. "Listen, Fred—" But only silence greeted me. "Fred, the fifteen hundred dollars was stolen! Someone broke into my room and took it! Fred—" But Fred had rung off, and no answer came across the wire.

When Mother's Advice is Most Needed

GIRL'S future health and happiness depends to a large extent on conditions during the adolescent period.

At about fourteen years of age important mental and physical changes are taking place, which every girl should understand. Then it is that she needs the care and advice of her mother. Unfortunately this is about the time when school

work and examinations are likely to prove an excessive strain on the nervous system. Anaemia, chlorosis or nervous breakdown in the

form of St. Vitus' dance are not uncommon at this There is a failure of the blood to supply the nourishment required by the nervous system. Ex-

cessive mental effort consumes the nervous energy required to insure good digestion and the proper functioning of the vital organs. It is surprising to find how quickly the nervous system responds to the restorative influence of Dr.

Chase's Nerve Food. There is no longer any question that this treatment is admirably suited to help girls through this most critical period of their lives. In almost every community are many cases to prove the exceptional restorative influence of this

well-known treatment. The use of the nerve food stimulates the appetite, improves digestion, and builds up the system in every

Miss Rena B. Crossland, Kempt, Queen's Co., N.S., writes: "I feel it a duty, as well as a privilege, to tell of the wonderful benefit I derived from the use of Dr. Chase's Nerve Food. In March, 1917. I had anaemia of the brain, and the mental and physical suffering I endured is indescribable. I had treatment from three doctors, and for twelve days was unconscious; while for three months I was fed and cared for like an infant. My mother was so anxious for me to use Dr. Chase's Nerve Food that she crushed it and baked it in my food. After using two boxes I could feed myself, and after using it for two months, my health improved so rapidly that doctors and friends said my recovery was a miracle.

"I cannot recommend Dr. Chase's Nerve Food too highly, even to those who seem to be facing death. We keep it in the house new, and I use it occasionally to 'keep fit.' I shall always regret that I did not follow my mother's advice and use it while I was away teaching, whenever I felt nervous or tired. But as I had no serious illness and did no realize the value of it. I neglected heeding mother's advice until it was too late and I had a complete breakdown.
