CANNING PRESERVING AND JELLY-MAKING Are Easy When You Have A 'WEAR-EVER' Aluminum Roaster AND A 'WEAR-EVER' Preserving Kettle

Place a cube of chocolate in a 'Wear-Ever' roaster without grating, without adding water and over a low fire, without stirring. Chocolate will not burn.

You'll be impressed with 'Wear-Ever' Aluminum Utensils once you have used them—especially at canning, preserving and jelly-making time, although you'll prefer them for general culinary purposes. There are no joints, seams, or soldered parts to collect dirt, they cannot scale or chip—are pure and safe. They take more heat, quicker and store it longer than other utensils, and so are much easier on fuel.
