

Just Received, a Fresh supply of  
Moffat's  
VEGETABLE LIFE PILLS  
AND  
PHENIX BITTERS.

IT A CONTRAST.—All nations from the remotest ages, have had ships, but Columbus only found out the way to America. Before the discovery of the great Spanish navigator, people were only enabled to paddle about the shores. Just so with the Life Medicines. It is but two short years since I first ventured upon an unknown ocean, and have discovered the precious object I was in search of—HEALTH. Vegetable medicines were indeed known when I commenced my search, but their use was not. By the use of them, I have not only passed from a debilitated invalid, to the hale, hearty and active man of business, but comparatively speaking, I have renewed my youth. I can thus, with confidence in my own experience, advise every fellow citizen. Does the reader want proof that the VEGETABLE LIFE MEDICINES are suitable to his own case? I have on file at my office, 546 Broadway, hundreds of letters, from some of the most respectable citizens of this my native land, voluntarily offered in testimony of the virtues of A GOOD VEGETABLE MEDICINE.

Persons whose constitutions have been nearly ruined by the 'all-infallible' mineral preparations of the day, will bear my witness, that the Life Medicines, and such only, are the true course to permanent health. JOHN MOFFAT.

GENERAL REMARKS RELATIVE TO MOFFAT'S LIFE PILLS AND PHENIX BITTERS.

These medicines have long been known and appreciated for their extraordinary and immediate powers of restoring perfect health, to persons suffering under nearly every kind of disease to which the human frame is liable, and which it has appeared scarcely less to miraculously to those who were unacquainted with the beautiful philosophical principles upon which they are compounded, and upon which they consequently act. This fact is well manifested and sensible action in purifying the springs and channels of life, and ending them with renewed tone and vigor, that they were indeed for their name, which was bestowed upon them at the spontaneous request of several individuals whose lives they had obviously saved.

The Proprietor rejoices in the opportunity afforded by the universal diffusion of the daily process for placing his VEGETABLE LIFE PILLS within the knowledge and reach of every individual in the community. Unlike the host of pernicious quackeries, which boast of vegetable ingredients, the Life Pills are purely and solely vegetable, and contain neither Mercury, Antimony, Arsenic, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and useful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, were altogether unknown to the ignorant practitioners of quack science; and were never before administered in so happily efficacious a combination.

Their first operation is to loosen from the coats of the stomach, and to clear the various impurities and crudities constantly settling around them; and to remove the hardened feces which collect in the convolutions of the small intestine, and which, by their partial cleanness, tend to leave such obstructions, as to produce habitual constiveness, with all its train of evils, or sudden diarrhoea, with its attendant dangers. This fact is well illustrated by the numerous instances, who examine the human bowels after death; and hence the prejudice of these well informed men against the quick medicines of the day. The second effect of the daily process of the LIFE PILLS is to cleanse the kidneys and the bladder, and by this means, the liver and the lungs the beautiful action of the Life Pills, is to regulate the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and lungs before it passes into the heart, being thus purified by them, and nourished by them, is purified from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

The following are among the distressing variety of human diseases, to which the Vegetable Life Pills are well known to be infallible:—Dyspepsia, the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acrid kind;—Flatulency, Palpitation of the Heart, Loss of Appetite, Headache and Head-ache, Rheumatism, Biliousness, Langour, and Melancholy, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure;—Nervous debility, by relaxing the whole length of the intestines with a solvent process, and without violence; all violent purges leave the bowels closed within two days. Diarrhoea and Cholera, by removing the sharp irritants by which these complaints are occasioned, and by promoting the lubricative secretion of the mucus membrane. Fevers of all kinds, by restoring the blood to a regular circulation, through the process of purification in some cases, and the thorough solution of all intestinal obstructions in others. The LIFE PILLS have been known to cure Rheumatism permanently in the most obstinate cases, by removing the morbid matter to which the disease is due;—Joint pains, by restoring the fluid to its natural state, and by restoring the ligaments of the joints. Dropsies of all kinds, by freeing and strengthening the kidneys and bladder; they operate most advantageously upon the urinary organs, and hence have never been found a certain remedy for the worst cases of Gravel. Also Worms, by dislodging from the turnings of the bowels the morbid matter to which the disease is due;—Anemia, Consumption, and a striking improvement in the Clearness of the Skin. Common colds and influenza, will always be cured by one dose, or by two in the worst cases. Piles: as a remedy for this most distressing and obstinate malady, the Vegetable Life Pills deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the Proprietor of these invaluable Pills, was himself afflicted with this complaint for upwards of thirty-five years, and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. He however, at length, tried the medicine which he now offers to the public, and he was cured in a very short time, after his recovery had been pronounced not only improbable, but absolutely impossible, by any human means.

DIRECTIONS FOR USE.—The Proprietor of the VEGETABLE LIFE PILLS does not follow the base and necessary practice of the quacks of the day, in advising persons to take his Pills in large quantities. No good medicine can possibly be so required. These Pills are to be taken at bed time every night, for a week or fortnight, according to the obnoxiousness of the disease. The usual dose, from two to five, according to the constitution of the patient, may be taken at bed time, and at such other times as may be required. These Pills will effect a sufficiently happy change to guide the patient in their further use. These Pills sometimes occasion sickness and vomiting, though when taken in moderate quantities, they never give pain unless the bowels are very much encumbered. They

may be taken by the most delicate females under any circumstances. It is, however, recommended, that those in latter periods of pregnancy should take but one at a time, and thus continue to keep the bowels open; and even two may be taken when the patient is very constipated. One pill in a solution of two table spoons full of water, may be given to an infant in the following doses—a tea spoon full every two hours all the operation for a child from one to five years of age, half a pill—and from five to ten, one pill.

THE PHENIX BITTERS, are so called, because they possess the power of restoring the expiring embers of health, to a glowing vigor throughout the constitution, as the Phoenix is said to be restored to life from the ashes of its own dissolution. The Phenix Bitters are entirely vegetable, composed of roots found only in certain parts of the western country, which will infallibly cure FEVERS AND AGUES of all kinds; will never fail to eradicate entirely all the effects of Mercury, infinitely sooner than the most powerful preparations of Straparilla, and will infallibly cure the tertiarism of BLOOD TO THE HEAD; never fails to cure the sickness incident to young females; and will be found equally efficacious in all cases of general debility, and weakness of the most unproved constitutions. As a remedy for Chronic and Inflammatory Rheumatism, the efficacy of the Phenix Bitters will be demonstrated by the use of a simple bath. The neutralizing bitters is half a wine glass full, in water or wine, and this quantity may be taken two or three times a day, about half an hour before meals, or a few minutes after. These bitters will cure all the affections which are affected with indigestion after meals, these Bitters will prove invaluable, as they very greatly increase the action of the principal viscera, help them to perform their functions, and extract the stomach to discharge into the bowels whatever is offensive. This indigestion is easily and speedily removed, appetite restored, and the mouths of the absorbent vessels being cleared, nutrition is fortified, and strength of body and energy of mind are the happy result. For further particulars of MOFFAT'S LIFE PILLS, and PHENIX BITTERS, apply at Mr. Moffat's office, No. 546, Broadway, New York, where the Pills can be obtained for 25 cents, 50 cents, or \$1 per box; and the Bitters for \$1 to \$2 per bottle. Numerous certificates of the successful efficacy of both, may be there inspected.

In some obstinate and complicated cases of chronic and inflammatory Rheumatism, Liver Complaints, Fevers and Agues, Dyspepsia, Pleurisy, Catarrhs, and other diseases of long standing, it may be found necessary to take both the Life Pills and the Phenix Bitters, in the doses before recommended.

N. B.—These Pills and the Bitters will get all mercury out of the system infinitely faster than the best preparations of Straparilla, and are a certain remedy for the redness of blood, the heat of the face, violent headaches, the delirium, &c.—All persons who are predisposed to apply, &c., should never be without the Life Pills or the Bitters, for they will save life. The circulation of the blood, draw all pressure from the head, restore perspiration, and throw off every impurity by the pores of the skin.

For further particulars of the Life Pills and Phenix Bitters, see Moffat's Good Samaritan, which contains a full account of the Medicine. A copy accompanies the Medicine, and can also be obtained on application at the Circulating Library, in this city, where the Medicine is for sale, and also at Messrs. Peters and Tilly's, No. 4, King street. St. John, April 1858.

FAMILY MEDICINES.

EVANS' CAMOMILLE AND APERIENT is introduced under the direction of the "Society for the Restoration of Health," in London, and having gained in England great celebrity by innumerable cures, and the high testimonials which are daily introduced into this country, and are now offered to the Public, with confidence that their highly-distinguished character will stand the test of the most thorough and scientific analysis. It cannot be denied that whilst many medicines which are recommended to the public, have not even the most trifling merit, there are others which will be great mischiefs, and which are prejudicial to involve, in a common condemnation. And when a medicine, comes endorsed with the testimonials of the medical profession, and warranted by the seal and signature of long and uniform success, the proprietor makes no unreasonable demand upon public confidence, when he claims for it a superior consideration.

The Camomille Preparation of Dr. W. Evans is undeniably entitled to this enviable distinction: for, whilst the following distressing symptoms, Sick headache, Giddiness, Vertigo, Trembling, and all the other symptoms which attend the disease, are every medical practitioner that is acquainted with, freely acknowledges its pre-eminence; and that the benefits which it has conferred upon his personal interests must be attributed either to their candor and love of truth, or to their unwillingness to fly in the face of all observation, and the testimony of those in some cases, and the thorough solution of all intestinal obstructions in others. The LIFE PILLS have been known to cure Rheumatism permanently in the most obstinate cases, by removing the morbid matter to which the disease is due;—Joint pains, by restoring the fluid to its natural state, and by restoring the ligaments of the joints. Dropsies of all kinds, by freeing and strengthening the kidneys and bladder; they operate most advantageously upon the urinary organs, and hence have never been found a certain remedy for the worst cases of Gravel. Also Worms, by dislodging from the turnings of the bowels the morbid matter to which the disease is due;—Anemia, Consumption, and a striking improvement in the Clearness of the Skin. Common colds and influenza, will always be cured by one dose, or by two in the worst cases. Piles: as a remedy for this most distressing and obstinate malady, the Vegetable Life Pills deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the Proprietor of these invaluable Pills, was himself afflicted with this complaint for upwards of thirty-five years, and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. He however, at length, tried the medicine which he now offers to the public, and he was cured in a very short time, after his recovery had been pronounced not only improbable, but absolutely impossible, by any human means.

THE HARTFORD FIRE Insurance Company, OFFERS TO insure every description of Property against loss or damage by Fire, on reasonable terms. This company has been doing business for more than twenty-five years, and during that period have settled all their losses without compelling the insured in any instance to resort to a court of Justice. The Directors of the company are—Elihu Hunt, James W. Huntington, S. H. Huntington, A. Huntington, John A. Huntington, J. B. Ward, F. G. Huntington, Elisha Col. R. B. Ward, ELIHAET TERRY, President. The subscriber having been duly appointed as Agent for the above company, is prepared to issue Policies of Insurance against Fire, and all descriptions of Property in this city, and throughout the Province on reasonable terms. Conditions made known, and every information given on application to JOHN ROBERTSON, St. John, 1st July 1858. P. S.—The above is the only Agency established by this company in St. John.

HARVEY STAGE LINE.

NAPHER, Esq., New Brunswick, Mr. ALAN CURRIE, Canning, N. S., Mr. CHAS. JAMES, Eastport, Maine, Londonbury, N. S., Mr. JAS. K. FULTON, Chatham, (Miramichi), GEORGE KERR, Esq., St. John, 20th April, 1858.

has yet been attempted by any other practitioner, and to direct the attention of the afflicted to those few and simple remedies by which many of the most prevalent diseases may be arrested and removed; and this is proved by the city bills of mortality; and its victims throughout the country, have been almost the same proportion to the population. Consumption (or Marasmus Pathiae) is of three kinds, the Catarrhal, the Apoplectic, and the Tubercular. In catarrhal consumption, the cough is frequent and violent, with a copious expectoration of a thin, offensive, purulent mucus, sometimes, but not frequently, streaked with blood. There is generally a soreness about the chest, with transitory pains shifting from side to side. Its ordinary course is a neglected cold, and is therefore a common kind of consumption in a climate subject to such sudden and extreme changes as ours. In the Apoplectic Consumption, the cough returns in fits, and is for some time dry, but with very little expectoration, and is attended with a sense of weight in the chest, which is increased by lying upon the side.—The dry cough at length changes to a copious expectoration of purulent mucus, although many other painful symptoms are temporarily relieved. At this stage, the disease is rarely ever cured. In the Tubercular Consumption, the cough is short and tickling, and is often an exertion of the watery, which sometimes, and sometimes tinged with blood. The pain in the chest is slight, and there is an almost insupportable sense of weight in the system generally, which when seated in the lungs, can seldom be arrested in its fatal progress unless met in its early stages. Catarrhal consumption, begins with the following common symptoms, by removing which, it may certainly be cured. It is attended with a sense of weight in the chest, and is accompanied with more frequent respirations, which sometimes induce him to relieve himself by making a deeper respiration similar to a sigh. When he does so, he usually feels an uneasiness across the chest; and as these symptoms increase, they are attended with more ordinary perspiration at night, so as to leave him refreshed in the morning, and consequently with less than his usual freedom, and consequently with more frequent respirations, which sometimes induce him to relieve himself by making a deeper respiration similar to a sigh. When he does so, he usually feels an uneasiness across the chest; and as these symptoms increase, they are attended with more ordinary perspiration at night, so as to leave him refreshed in the morning, and consequently with less than his usual freedom, and consequently with more frequent respirations, which sometimes induce him to relieve himself by making a deeper respiration similar to a sigh. When he does so, he usually feels an uneasiness across the chest; and as these symptoms increase, they are attended with more ordinary perspiration at night, so as to leave him refreshed in the morning, and consequently with less than his usual freedom, and consequently with more frequent respirations, which sometimes induce him to relieve himself by making a deeper respiration similar to a sigh. When he does so, he usually feels an uneasiness across the chest; and as these symptoms increase, they are attended with more ordinary perspiration at night, so as to leave him refreshed in the morning, and consequently with less than his usual freedom, and consequently with more frequent respirations, which sometimes induce him to relieve himself by making a deeper respiration similar to a sigh. When he does so, he usually feels an uneasiness across the chest; and as these symptoms increase, they are attended with more ordinary perspiration at night, so as to leave him refreshed in the morning, and consequently with less than his usual freedom, and consequently with more frequent respirations, which sometimes induce him to relieve himself by making a deeper respiration similar to a sigh.
