W. Cowper.

COPY of MINUTE of the Board of Admiralty respecting the Equipment of the "North Star," for the purpose of taking out a Supply of Provisions, &c. for the Crews of Her Majesty's Ships "Investigator" and "Enterprise," employed on an Expedition to the *Arctic Regions*.

Admiralty, 23 March 1849.

THE Lords Commissioners of the Admiralty are under the necessity of laying a Supplementary Vote for the Relief of the Arctic Expeditions under Sir John Franklin and Sir James Ross, upon the Table of the House.

Their Lordships having been apprised by the last letters received from Sir James Ross, that it was his intention to direct the "Investigator" to land all the supplies, that she could spare, at Whaler Point, and to proceed to England, if no tidings of the expedition under Sir John Franklin were received by the whale ships now about to sail, leaving the "Enterprise" to prosecute the search alone, have consulted the highest naval authorities as to the probable consequences of this step.

They find it to be the unanimous opinion of those most conversant with the Polar seas, that such a separation of the ships under Sir James Ross would be most perilous to the ship remaining in the ice, and would, probably, neutralize the entire object of the expedition, if Sir John Franklin's party were to be discovered at a time when the "Enterprise" had nearly exhausted her own stores.
