

range in the Province. Arrives about the middle of May, departs about the end of August.

GENUS SAYORNIS.

178. **Phoebe.**

(Sayornis phoebe.)

An abundant summer resident, breeding about farm buildings and bridges throughout its range in the Province. Arrives early in April, departs early in October.

GENUS CONTOPUS.

SUBGENUS NUTTALLORNIS.

179 **Olive-Sided Flycatcher.**

(Contopus borealis.)

A regular but uncommon visitor. I have found one or two each spring for several years, but have not seen it at any other season.

SUBGENUS CONTOPUS.

180. **Wood Pewee.**

(Contopus virens.)

Common summer resident, breeding in woods throughout its range in the Province. Arrives about the middle of May, departs about the middle of September.

GENUS EMPIDONAX.

181. **Yellow-bellied Flycatcher.**

(Empidonax flaviventris.)

An uncommon visitor. I have seen a few each spring, but have never seen the species later than June. It probably breeds throughout its range in the Province.

182. **Traill's Flycatcher.**

(Empidonax traillii.)

A regular visitor, generally distributed, but never common. I have only found it in spring in Southern Ontario.

Breeds in the interior.

183. **Least Flycatcher.**

(Empidonax minimus.)

Common summer resident, breeding in orchards, shrubberies and woodlands throughout its range in the Province.

Arrives about the middle of May, departs at the end of August.
