CLYDEDALES, Imp. Stallions and Fillies. Fresh importations always on hand. Every mare guaranteed in foal.—J. & J. Semple, Milverton, Ont., and Laverne, Minn., U.S.A.

others' experiences in the past, and this year will put on a sale, which bids fair to eclipse anything yet held in point of management and general all-round satisfaction. Note the very stringent conditions of the sale, as given in connection with their large advertisement, given elsewhere in this issue. Note also the big number of females and only a few males that are being consigned, and note also the high character of the breeding of the bulls leading the herds from which this stock is being consigned. These facts are all given in the large display advertisement.

A point of unusual interest in connection with one of the sires of stock that will be consigned—the bull used in both of the herds of M. H. and M. L. Haley is that his get won first at Toronto for two years, in young herds, and practically all of the Grand Champion heifer at Ottawa this year, also being the Grand Champion lass at Toronto, is out of this bull. Amongst the five that M. H. Haley is consigning is a four-year

30th, Junior four-year-old and a 36th, Junior three-year-old; also only cow in the world to make 129 lbs. butter in 30 days, and produce a daughter having a record of 130 lbs. butter in 30 days. This great bull is the only one to have seven tested daughters, which, at an average age of 2 yrs. 6 mos., average 201 lbs. butter in seven-day official records. This is the best record for the first seven daughters to be tested of any bull of the breed. He is now 5 years old, and has been in use in the Stevens Bros' herd, he was bought by A. H. Harnish, who used him in his herd and who owns the seven daughters mentioned in the foregoing. Mr. McQueen is also consigning into the sale one daughter of this bull, of a 21st, two-year-old dam, the record being made last June, when the weather was very hot, and she is out of a 212 lb. cow that has a 22 lb. dam; also putting in one heifer in calf to son of Pietertje Hengerveld Count de Kol and a young bull sire, both of the great bull whose pedigree we have just given in detail, and out of a dam that has a record of 2312 lbs. and with a granddam 22 lbs.

DAIRY CATTLE BREEDERS' BANQUET

The leading winners in the dairy cattle classes at the Winter Fair, Moose, G. B.

A Great Dairy Bull Individually and Very Richly Bred

Lewis Prilly Boubie Hartog, here shown, and which for some time has been heading the herd of T. W. McQueen, at Tillsonburg, Ont., is a most richly bred individual, his breeding is given in detail in the article adjoining. This illustration does not do this bull justice, since it shows him just as he was taken out of the stable, and he is not placed as well as might have been to show up his strong points in conformation. Note his strong head and general appearance of masculinity, promising unusual progeny. Mr. McQueen is consigning stock from this great bull to the Southern Ontario Breeders' Consignment Sale, Tillsonburg, Wednesday, January 1st. For full particulars note article adjoining, and large advertisement elsewhere in this issue. (Adv't.)

old out of the first prize dry cow at both Toronto and London this year, this dry cow having been shown by Mr. Gordon Goodrich of Bedford Park, who bought her at the consignment sale a year ago. He is also putting in one of her daughters, bred by the great Grace Payne bull.

MR. MCQUEEN'S CONSIGNMENT

Mr. T. W. McQueen has consigned to the Tillsonburg sale, January 1st, two grand-daughters of Pietertje Hengerveld Count de Kol—a bull with 100 A. R. O. daughters; he is the sire of De Kol Creamline, first cow to make over 100 lbs. milk in one day. He is putting in also one great-granddaughter from this bull, and sired by a bull from his best cow. Also Mr. McQueen is consigning one yearling daughter from his own herd bull, Lewis Prilly Boubie Hartog. This great individual we illustrate in the cut here with Note his exceptionally rich breeding as given in the following.

Sired by Beauty Pietertje Butter King, out of Beauty Pietertje, first cow in the world to make 30 lbs. butter in seven days, and to produce a daughter to make over 30 lbs. butter in seven days—she is the best daughter of Prilly Prilly, and Beauty Pietertje, Lillian Walker Pietertje, and Ruby Walker Pietertje, and another dam (whose name we overlooked) held the world's record for four and five generations for milk, butter and per cent of fat.

The dam of this bull of Mr. McQueen's is Margaret Boubie Hartog—dam of Abbie Hartog Clothilde—only cow in the world with 21-lb. record, and which has produced

Ryan, of Courtland; N. E. Dymont, of Clapton; W. H. Cherry, of Garret, and M. McQuinn, of Oxford Centre, entered their prize exhibitors and some friends to a banquet last week at the time of the Guelph Winter Fair. Mr. John McKee, of Norwich, presided, and expressed the feelings of all present, when he stated that there should be no conflict of interests between the Arrishire, Jersey and Holstein cattle breeders. Instead, they should unite their forces in a common war against the scrub dairy animal.

Prof. H. H. Dean, of Guelph, illustrated the importance of the dairy interests that the dairy cows in Ontario are worth \$20,000,000, and produce \$500,000,000 worth of dairy products a year.

The hosts of the evening were complemented upon their success by the various speakers who included J. J. Hammer, Supt. of the Winter Fair, W. W. Ballantyne, of Stratford; J. B. Richardson, of Caladonia; C. Wood, H. B. Cowan and C. Nixon, of Farm and Dairy, and Mr. Franklin, of the Canadian Farm.

Amongst sales and purchases that were completed at the Guelph Winter Fair last week were a pair of Gyldestade fillies, two-year-olds, brought in by Mr. Roe, of Haddons, too late for competition. They were exceptionally superior individuals, and in the show, had they been on time, they should have been right at or very near the top. A. Watson & Sons, of St. Thomas, purchased them, the price being something over \$1,000. They are both in foal, and will be a most valuable addition to the stock of Mr. Watson's at the Sprucedale Stock Farm.
