# Ramsay's Paints

for homes, inside and out, for barns and fences—Ramsay's Paints are the right paints to paint right.

Heat and cold—dryness and moisture—can't affect them. They hold their color and fresh lustre in spite of the elements.

65 years and more making the right paints prove that we make them right.

Write us, mentioning this paper, and receive Souvenir Post Card Series showing how some houses are painted.

**A. RAMSAY & SON CO., Paint Makers Since 1842, MONTREAL. 67**

**Built for Service**

Every part shows it.

**Fused Joints.** The radiating chamber has walls and flues of steel (the best radiating material) joined in one piece to the cast-iron with Hecla fused joints—which can never loosen or leak unhealthy gas, smoke or dust into the house.

The Fire Pot is cast in two sections, bound with heavy flanges, which add 50% to the radiation surface. The combustion chamber is made of heavy cast iron, and is corrugated to provide additional strength and heating power.

## "Hecla" Furnaces

have other points of advantage over other furnaces that you should know about. There is not a weak spot in them from top to bottom.

See your nearest dealer or write "Clare's Furnace Builder" for new illustrated catalogue and estimates.

**Clare Bros. & Co. Limited, Preston, Ont.**

**THE BISSELL 3 DRUM STEEL LAND ROLLER**

Has a low hitch—is light of draught, with no neck wheel—pressed steel heads in all the drums—large anti-friction rollers used in the bearings—no centre bearing to squeal and cut and cause trouble. The "BISSELL" Roller will stand up against any amount of hard work—8, 9 and 12 feet widths. Ask your dealer for prices, or drop a postal to Dept. R. for particulars.

**T. E. BISSELL - ELORA - ONT.**
