The Northern Belle Mining Company Share holders Decide to Reorganize the Company on an Assessable Basis -Copper Mountain

Mr. James D. Sword, M. E., and rep-

the east, namely, the South African trou-ble. Around Greenwood the work of completing the railroad to Midway has been recommenced, and the rails are now being laid. The road should be completed to Midway inside of a monta. The completion of the road from kholt to Phoenix has been suspended until the spring. There is a great amount of activity throughout the Boundary Creek camps and several strikes on properties under development ment have been made recently. wo mines are at present installing 20-drill compressor plants, namely, the Sunset and B. C., in Summit and Deadwood camps respectively, and the Mother Lode is about to install a 40-drill plant. It is not likely that either of the two smelters under construction will be under operation before next June, the reason of this being that the Mother Lode smelter will not be completed, and the Grand Forks smelter will not have immediate connection with the mines. According to the reports of should be by next midsummer at least 10 shipping mines tributary to Greenwood and Grand Forks, and some of them will produce a vey heavy tonage. The number may be considerably in excess of this, but the number mentioned may be regarded as a conservative estimate. The capacity of the smelters as at present designed should be taxed to the fullest extent and it does not seem ! is delivered for in Nelson and Trail

Notwithstanding the pessimistic views and machinery and supplies taken in. taken by many mining men as to the business to be done next year, on account of est known ore bodies on this continent, Lode. the war scare, there should be a very busy season in the Boundary country with a steadily and rapidly increasing produc-

THE NORTHERN BELLE.

Company to Be Reorganized on an Assessable Basis-Toronto Meeting.

shareholders of the Northern Belle Mining the price of copper ought to drop.

"A feature of great value is the fact that coke and coal can be obtained easily occupied the chair. After some discussion at was decided to re-organize the company on an assessable basis. Under the plan as the ore we can handle, and the price of copper ought to drop.

"A feature of great value is the fact to the north and south. In the south crosscut, at a distance of 30 feet from the shaft, an ore body has just been to contain ore of the camp, but seems to contain ore of the camp, but seems to contain more copper than ordinarily. The extent of the strike has not yet been demonstrated. on an assessable basis. Under the plan as the ore is self-fluxing, because of the presence in it of the necessary iron and lime three months. No call is to exceed 1 cent ian Pacific is completed to Hope, where per share. The company now has \$3,000 it will strike the main line to Vancouver, in the treasury, and it is expected that there is no estimating the possibilities of the first assessment, which will be made in February will provide funds enough to subsidy of \$11,000 per mile from the Doing the Mystery group in the Burnt Basin lative Assembly:

The property is carry on active development work for six months. The Northern Belle is attacted minimum and Provincial governments. The development work consists of 130 feet of tunnelling, and two shafts have also been sunk to a considerable depth.

Mark Houston, prospector, has just ar rived from Copper and eKnnedy mountains in the Similkameen district. He is interested in 17 claims, and has recently been working on the Big Hump group o four claims on Friday creek, which Hugh Henderson and Ed. Watson of Rossland and himself own. He has sunk a shaft 25 feet on a copper vein 10 feet wide, of which three feet is splefidid bornite orc.

Mr. Houston will soon return and continue the sinking all winter. Mr. Rogers of California, is working two shifts on a shaft, which is now down to feet on a fine vein of bornite ore. His claim is called the Muldoon.

Mr. Wheeler is working the Gladstone and has a tunnel in 125 feet, and has cut ped within an inch of the desired place. the vein, in which he has an encouraging

On Copper mountain, the old Caribos pioneer, Robert Stevenson, is working the Lost Horse, and has four shallow shafts, all showing very good copper ore. One of The McQuay Brothers are working the Canadian Boy and Union Jack and are

down 20 feet on each claim, with good ore. Mr. Houston visited the Sunset on December 27th when the shaft was down 90 feet in the finest copper ore he even saw. It was bornite and chalcopyrite mixed, and a good deal of it nearly solid ore steam plant is an excellent one, rapid and erty, writes that good progress is being pany, is about to go east it was resolved with automatic dump.
