spirit in verse 2. Reville—"Reproach"
(R. V.), slamber. This is one of Satan's wirked gloat over the evil that is reported of professed followers of Jesus. Falsely, for my sake—Unless the evil most used and powerful modes of attack. Slamber spreads pike wild-fire. The spoken against Christ's professed followers, is false there is no blessing promised. It must be spoken falsely and for invers. Is raise there is no dessing premised. It must be spoken falsely and for Jesus' sake. 12. Rejoice—The very opposite of complaining because of the persecution. Exceedingly glad—The abuse is not pleasant in itself but leads to blessedness. The positiveness of the premise and the certainty of its fulfilment are annile cause for cladbess. ment are ample cause for gladness. Great is your reward in heaven. There is rich reward in the present life; peace, the divine favor, joy, but by far the greater reward is in the future. We are encouraged to keep the heavenly reward in mind

Questions.-What event immediately precedes the lesson of to-day? Where and when was the sermon on the mount preached? Give meaning of blessed. What is meant by being poor in spirit? By the kingdom of heaven Who are the real mourners? What is promised them? Who are the meek? What is their inheritance? Who are the merci ciful? What is the result of being mer ciful? How is the heart purified? What me the persecuted blessed?

What Drainage is Worth in a Dry Season

During the exceptionally dry season of Burling the exceptionary dry season of Bull land that was underdrathed produced on the average about Babe more per acte then land that was not drained, accord-ing to data collected by the Department of Physics at the Ontario Agricultural College.

than land that was not drained, according to data conserted by the Department of Physics at the Ontario Agneuithral Colleges.

Raports were received from a large number of famers, of whom twenty-five were able to give definite figures on vicing on drained and understant had. Three of the number said they saw no difference, but all the others reported increases. Elever counties were supresented in the especial stage of his cases. The value of his respect, including straw, was figured at October, Bull noises, and Marvis, Bull prices. The rarmer showed an average of \$2.5 per acre, and the latter \$7.06, and both together an average \$5.5. The tilters who reported no herease were counted in obtaining the averages. In well seasons the results are even more marked, but even at \$5.5 per acre drains more than pay for themselves in two years.

In well seasons the results are even more marked, but even at \$5.50 per acre drains more than pay for themselves in two years.

The of assistance to farmers in laying out their drainage systems. The Department of Flywics has a special staff of drainage agreements for the services of these men, the only outday to the farmer being the travelling expenses, which are low. As the mallway fare is only one cent a mile for the surplus of the surplus of the surplus are divided about the several surveys are always made should are low. As the mallway fare is only one cent a mile for the work, and as several surveys are always made on one hip the expenses are divided about the farmer being the travelling expenses, which are low. 6/ INTEREST AND SAFETY

Price Bros. and Company Bonds pay 6 per cent on the investment. They offer the strong security of first mortgage on 6,000 square miles of pulp and timber lands—which are insured at Lloyds against fire. The carnings of the Company at present approximate twice the bond interest. The new pulp mill in course of construction will double this earning power. Purchased at their present price they pay interest at the rate of 6 per cent. The best posted investors in Canada and England have purchased these bonds. Owing to the security and increasing demand of the products of the Company, these bonds will unquestionably increase in value.

If you have money to invest write us for complete information.

LIVE STOCK.

Toronto despatch: There is an easier feeling on the market this morning, and many of the prices are off. Good and choice cattle are still in good demand, but the poorer quality are weaker. Feeding steers are also easier than yesterday's prices, but the offerings are fairly good. Stockers show not much change. Milkers and Springers are not in as good demand. Shep and lambs are rather scarce, and the prices are not as good as earlier in the week. Hogs are very plentiful, with prices unchanged. Calves are also very plentiful, and are not selling as strong as early in the week. Receipts show \$5 cars, consisting of \$61 cattle, 2,50 hogs and \$60 calves.

MONTRTAL LIVE STOCK.

MONTRTAL LIVE STOCK.

Montreal, que.—At the Canadian Facific Live Stock Market the receipts of
live stock for the week ending April 13
were 550 entile, 125 sheep and lambs, 400
hogs and 1,750 calves. The offerings on
the market this morning consisted of 600
cattle, 250 sheep and lambs, LI50 hogs,
and 2,500 calves. Owing to the fine wenther and the fact that a great many
butchers wanted some beef to carry them
over for the balance of the week, the
attendance of buyers was larger than
usual, and the demand for cattle was
good, consequently an active trade was
done and the undertone to the market
was strong, but prices showed no impertant change. Choice steers soid at
5.15 to \$2.55, and good at \$5.75 to \$7, and
the lower grades from that down to \$4.55
to \$8, 50 per cwt. Cows brought from
\$4.50 to \$8, and buils from \$4.55
to \$8, and \$8, a staff of experienced correspondents, under date of April 1st:

FALL WHEAT AND CLOVER: These crops were protected against the intense cold of midwinter by a heavy covering of snow, much of which still hav on the land at the end of March. This has made it difficult for correspondents to rereport definitely regarding their present state, but the opinion most frequently expressed was that both fall wheat and clover would come from under the snow in practically the same condition to which they entered. It was pointed out however, that the trying weather of April, with the alternate thawing and freeding, was yet to be met with before these crops reached the new growing season. FRUIT TREES: Until the buds began to swell it will be too early to speak definitely regarding the effect of the severe winter upon orchards. There are, however, a few reports of injury to peaches and other tender fruit frees on account of the very low temperatures of January and Pebruary, although the must serious injury from that cause as yet apparent has been the splitting of a number of apple trees. On the other hand, so far no damage from sleet storms has been sustained by orchards. Cotton-tail rabbits and mice are reported as doing considerable injury to young fruit trees.

LIVE STOCK. The unusual length and severity of the winter, the shortage of feath shortage and to like various classes of farm almais may be various classes of farm almais may be

fooder supplies and the great lack of bedding materials have been most trying to like stock. Notwithstanding these drawbacks, the general condition of the various classes of farm animals may be fairly summarized as being rather on the lean side, but healthy.

Horses on account of their high value, have received more attention than any other class of live stock, especially in the case of working horses, which are, as a rule, in fine shape. Outside of a few mild cases of disemper, no diseasens been reported.

Cattle are also in general health, considering that most of them have but interest and the case of working horses, which are, as a rule, in the case of working horses, which are as a rule, in fine shape. Outside of a few mild cases of disemper, no disease has been reported.

Cattle are also in general health, considering that most of them have but interest are rather scarce, and there are not as many store cattle as usual, and neither are up to the average in quality, owing to the paucity of fodder supplies. Sheep are comparatively few, but are in good condition, and early lambs are coming in nicely.

Swine are scarcer than usual at this time of year, and appear to have suffered more than other live stock from the long confinement of the hard winter. Early litters are not doing as well as usual. The scarcity and high prices of feed, and dissatisfaction with the market prices for hogs, are given as the reaso for the more recent failing off in numbers.

been largely used, both as ensilage and stover, to the savinc of many other volable fooders. METHODS: The bulletin will give detail querations from practical farmers as to how they met the difficult situation of a long and steadily cold winter, which short supplies or fodder. The outstanding features of this feeding campaguers, briefly: disposing of all unnecessary animals early: feeding only what would be eaten absolutely clean; from use of the outter, especially for siray, of which only the very poorest used many for heading, sawdust, haves, etc., be a smissificated; fuller adoution of the courterp, more particularly as ensilage, where one correspondent describes as "the salvation of those who had it; larger it ization of chaff for mixing with other fodders; purchasing noil feeds and bravers' grains, and cheap forces wheat from the Northwest.

HER FATAL MAIDEN TRIP

All is ready for the salling,
Note the round of rignal bells;
Friends are gathered at the railings.
With affectionate darewells.
Now the morstons engines wake.
As the good slip itaves the short
And soon there's hande a margin
Parting friends for eventore. All is merry—hear the laughter, Note the happy throng go by: Soon the bedlam turns to silence As the darkness fills the sky; In the gulet of the modifield,
While the merry theve less rest,
There's a dark hing of the moonl
Fy the sea's most obtained pest. Theker grows the lowering fog-si ear.

Dark and claiming falls the night,
Colder turns the salted zephyrs.

As nears the mod ship's plight.

Back and forward trends the look-act.

Calling hearsely "A." is well,"

Suddenly without a warning.

Comes the crish too great to tell.

There's a rising of the forwards,
For a moment—then a fall;
We can hear the rushing waters,
Pooring through the other wan;
As the water-palace soulds,
With her load of human freight.
To the God who scaled their fat-

To the God who seared their far Gave answer to their prayers; He calmed with hope and courage, Each leart of anxious cares. In miliatry the men shoot by— Their loved and weaker ones to a And with their laces to the sky, Sonk holdy to their watery grav-Twelve hundred men they numbered, From the lowly to the logic From the lowly to the high.

Finiters, husbands, all were loved.

Yet fare meant that they should be to prepared for teem a separatre.

Wide as the ocean, and as deep.
In ship-builders' greatest coffin,
A noble army caimly sleep.

Mighty men of lovine and training.

Built this burial case so weighty.

Fitted it without a failing.
As if defying the Aimighty.
It was launched with ceremony.
In the broad and deep Atlantic.

But fate planned that haught but failure.

Should befail the ship—"Titanic."

Many friends are left in sorrow—

Many friends are left in sorrow-

Many friends are left in soriow.
And the world is reason-bind,
But God of Heaven keeps the morrow
From the eyes of all mankind.
May He to those who mourn and grieve,
Extend His hand of peace and graze.
Until that day-oh, grand belief.
Wish the first and so face.
