

### DOCTOR URGED AN OPERATION

#### Instead I took Lydia E. Pinkham's Vegetable Compound and Was Cured.

Baltimore, Md.—"Nearly four years I suffered from organic troubles, nervousness and headaches and every month would have to stay in bed most of the time. Treatments would relieve me for a time but my doctor was always urging me to have an operation. My sister asked me to try Lydia E. Pinkham's Vegetable Compound before consenting to an operation. I took five bottles of it and it has completely cured me and my work is a pleasure. I tell all my friends who have any trouble of this kind what Lydia E. Pinkham's Vegetable Compound has done for me."—NORMA B. BRITTINGHAM, 609 Calverton Rd., Baltimore, Md.

It is only natural for any woman to dread the thought of an operation. So many women have been restored to health by this famous remedy, Lydia E. Pinkham's Vegetable Compound, after an operation has been advised that it will pay any woman who suffers from such ailments to consider trying it before submitting to such a trying ordeal.

### SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS

The sole heirs of a family, or any man over 15 years of age, who was at the commencement of the present war and has since continued to be a British subject or a subject of an allied or neutral country, may homestead a quarter section of available Dominion Land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at Dominion Lands Agency or Sub-Agency for District. Entry by proxy may be made on certain conditions, namely—six months' residence upon and cultivation of land in each of three years.

In certain districts a homesteader may secure an adjoining quarter section as pre-emption. Price \$3.00 per acre. Duties—Reside six months in each of three years after earning homestead patent and cultivate 50 acres extra. May obtain pre-emption patent as soon as homestead patent on certain conditions.

A settler after obtaining homestead patent, if he cannot secure a pre-emption may take a purchased homestead in certain districts. Price \$3.00 per acre. Must reside six months in each of three years, cultivate 50 acres and erect a house worth \$300.00.

Holders of entries may count time of employment as farm laborers in Canada during 1917, as residence duties under certain conditions.

When Dominion Lands are advertised or posted for entry, returned soldiers who have served overseas and have been honorably discharged, receive one day priority in applying for entry at local Agent's Office (but not Sub-Agency). Discharge papers must be presented to Agent.

William Mathews, John Young, Everett Goodfellow, John Taylor, Thomas Lawlor

**District Clerks**  
William Mathews, William Taylor

**Inspectors of Shingles**  
Joseph A. Gillis, John Sullivan

**LISTEN TO THIS!**  
**SAYS CORN'S LIFT**  
**RIGHT OUT NOW**

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called freemone, which the moment a few drops are applied to any corn, the soreness is relieved and soon the entire corn, root and all, lifts out with the fingers.

It is a sticky ether compound which dries the moment it is applied and simply shrivels the corn without inflaming or even irritating the surrounding tissue or skin. It is claimed that a quarter of an ounce of freemone will cost very little at any of the drug stores, but is sufficient to rid one's feet of every hard or soft corn or callus.

You are further warned that cutting at a corn is a suicidal habit.

### Ferry-men

Thomas Lawlor sr, Sanford Travis, Thomas Hamilton

**LUDLOW**

List of Parish and County Officers for the Parish of Ludlow in the year 1918

Constables  
Hall Reid, Wm. Black, Chas. E. Duck, David Stewart Sr., Rainsford O'Donnell, John McKay, Walter O'Donnell, Cruden Price, Wm. Carroll, Melvin Murphy, Howard Lyons.

Weights of Hay and Straw  
John Whalen

**H. BRAITHWAITE SAFE**  
Henry Braithwaite, aged 78 years, returned to Fredericton last week

### Horse Breeding and Environment

At the present time there is an enormous demand for heavy work horses which cannot be adequately met with, and as a consequence, prices are higher than they have ever been before. This condition, though chiefly caused by the use of a large number of horses for war purposes, is likely to continue for many years after the termination of the war. Nowhere is the demand keener than in Western Canada, where considerable areas of arable land are available for putting into crop. The market there is an immense one. Farmers are breaking more land every year, and although large numbers of tractors are being used, many farmers prefer to use horses. New settlers continue to arrive in increasing numbers. It has always been possible to sell locally bred horses at prices altogether out of proportion to the cost of production. The country is particularly adapted to the industry, and large as are the returns from other branches of farming in Western Canada, in none are they larger than those which the farmer who engages in the raising of horses may expect.

In an article written by Mr. E. A. Davenport, of Acme, Alberta, which appeared in a recent issue of the "Farmer's Advocate" (Winnipeg), some of the advantages possessed by Western Canada as a horse raising country are pointed out. Mr. Davenport has been a successful breeder of Percheron horses in Alberta for a number of years, and writes from experience.

"We are fortunate in Western Canada that our climatic conditions are favorable for the production of healthy horses, that our soil conditions are such that the feed grown is wholesome and nourishing for the construction of a strong, perfect and enduring frame. The atmosphere is bright, bracing and pure, with the oxygen required for lung development and blood building, while abundant sunshine benefits animals and plants alike. For the development of dense, silky bone of sufficient calibre mineral matters must abound in the food and drink of horses. Without these requisites of nourishment imperfect animals will be produced. Western Canada in regard to these requirements is eminently adapted for the breeding and rearing of horses of the highest type and quality. Her soils are rich in mineral matters; her drinking waters are strongly impregnated with minerals; her feeds are both rich in proteins and earthy materials, and especially fitted for perfect frame building. We can at all times supply our horses with nutritious feed from never-failing sources.

"Of the commercial foods bran is proving to be of particular value in the feeding of horses, as it furnishes materials for the development of strong bones, dense tendons, tough hoofs and powerful muscles, the essentials for which the Western horses are already famed.

"It may, therefore, be stated with confidence that Western Canada favors these desirable qualities, which are less perfectly developed where the climate is hotter and consequently less bracing, and where the character of the soil is better adapted for the production of corn and other food materials more or less deficient in frame building ingredients. We can almost better than any other section of the country produce draft horses of ideal quality and development as regards frame, vigor, stamina, constitution, docility and durability. There are no more important or necessary requirements than these in a horse that works hard in the city or upon the farm."

### Children Cry for Fletcher's

The Kind You Have Always Bought, and which has been in use for over thirty years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

**What is CASTORIA**  
Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.
