cona company. On Monday nigh Question of Market. next a public meeting will be held in Strathcona, when the question will be discussed, and a representative the Edmonton council will be presen

to submit this city's proposal. In their report, the city commis sioners deal in detail with the negotiations concerning the original pro position of an inter-urban system. It is pointed out that when the street railway question was taken up in the spring a preliminary survey of a line to Strathcona was made. The opinion has been held from the out set that an inter-urban system can b made remunerative from its incep tion. Together with the city's system the work on the Strathcona connec tion was discontinued when the finan cial stringency made itself felt, and in consequence negotiations were held in abeyance. It is generally admitted that independent lines in the two cities can not be made to pay. Fur

connected with the transference of passengers from one system to th The report recommended that Strathcona will give running right: over its streets, the city of Edn nontor will undertake to build a line in that city in 1908, the franchise to be non exclusive. A mile of railway will be constructed for every 3,000 of popula tion in both cities. For instance, as suming Edmonton has a population of 18,000, six miles of railway will be built, and if Stratheona has a popu lation of 6,000 two miles will be con structed. Edmonton will also under take to build the connecting line over the traffic portion of the C. P. R.'s high level bridge, when constructed. Edmonton will further agree to ar range rates with the Strathcona coun
