Champion says: An secident occurred at the Grist Mill of Mr. Wm. Campbell, of Progressing, of the most fearful mature. It appears that a daughter of his, aged eight years, accompanied by a younger eister, ran up the stairs to the third storey of the mill, when the oldest of the two sat down to rest herself near the two sat down to rest herself near the two sat down to rest herself near the bedween the shaft and the wail, crushing and mangling her in a terrible manner about the head and legs. The slarm was instantly given by the younger sister to a couple of men below, who instantly rushed up and with some difficulty extricated her from her fearful position. The injuries were so severe that her life was despaired of for some days, but now some hopes of her recovery are entertained.

The Leader is commended to a decident occurred at the Grist Medical Dispensary COUGH NO MORE!

Guelph Markets.

MERCURY OFFICE, GUELPH. October 2, 1868.

October 2, 1868.

Our market is now well supplied with grain. The demand is good and the competition keen amongst buyers. Spring and fall wheat keep about the figures quoted by us; the same may be said in reference to cats. Barley, however, has taken another upward jump, and to-day as high as \$1.18 was paid for several loads of superior quality; the ruling figure being 1 16. Hay ranges from \$5.00 to 12.00 per ton. Floor \$100 hs\$3.00 @ \$3.00

PROSPECTUS.

The Business Affairs of the Company

CONTRACT OF CONNECTIONS

A contract, granting permanent consection and extraordinary advantages, has already been executed between this Company and the Atlantic and Pacific Company of New York; commencement, as the lines of this Company are constructed from the Suspension Bery commencement, as the lines of this Company are constructed from the Suspension Bery commencement, as the lines of this Company are constructed from the Suspension Bery commencement in the States, touched by the lines of the Atlantic and Pacific Telegraph Company, are brought in immediate connection therewith.

A permanent connection has also been secured with the Great Western Telegraph Company of Chicago, whereby this Company will be brought into close connection with all the Lake Ports and other places through the North Western States, and through to California. All classes of society are interested in extending the use of the Telegraph, at LOW R.4TES, and the Director are satisfied that the adoption of a scale of charges considerably below the rate now exacted in Canada, will by encouraging a much more extended use of contract the contract of the contract of the public senerally, but will also ensure a safe and profitable return to the investor.

On the 25th day of June, A. D., 1888, the DOMINION TELEGRAPH COMPANY was duly OHARTERED according to law.

The admitted importance and value of Telegraph Company to the Canadian Public unnecessary had it not been that previous attempts to establish Telegraph Companies in Canadia, to share the business with the Montreal Company, and been allowed to fall through. The success of a Telegraph Company will mainly depend on its ability to meet the domands company, of access to all quarters with which its outcomers may desire to have communication.

This important requisite has not been, until now, within the reach of any Company enter-

tof the public, and consequently it should possess, at least, equal facilities with any other Company, of access to all quarters with which its customers may desire to have communication.

In the field as a competitor with the Montreal Company in consequence of the close and exclusive gonnection formed between that Company and the Western Union Company of the United States, the latter by virtue of certain patents, having until within these two years, monopolized nearly the whole of the telegraph basiness in the neighboring Republic.

The business relations between these two Companies continue in full force, but the patents having run out, the monopoly so long enjoyed by the Western Union has ceased to exist. The Atlante and Pacific, the Great Western, and other American Companies have invaded the field, and have become successful competitors for the public patronage and support. These Companies, acting on the cheap postage principle, have forced the old monopolist to a communication; and much to the surprise of the Western Union itself, has increased it profits, whilst sharing its field of operation.

With these new Companies the Dominion Telegraph Company of Canada have entered into most satisfactory business relations, and confident of the soundness or the principle which led to the adoption of the penny postage system in Great Britain, the voluntary reduction from \$100 to 156 or ten word message by the Ocean Cable Company, and the successful operations of the Companies recently established in the United States, invite the business and mercantile community of Canada to Join them in the promotion of an enterprise, based on the principle of moderate rates and extended business, which, while injuring no one, they benefit to the community. It is necessarily a present the reduction of rates by the Atlantic Cable Company, and the successful operations of the Companies recently established in the United States, invite the business and the principle of moderate rates and extended business, which, while injuring no on

NTERMEDIATE, do \$45.50.
STEERAGE, do do \$29.50.
Return Tickets at reduced rates. Prepaid Passage Certificates issued to bring friendsout, at the west rates. For Tickets, Laterooms an very information apply to general passage of the second part of the second par

than one message to every six persons, the latter, two to every three. From these atturns and results it may be reasonably inferred that a reduction or rates to a tariff at which the wires of both Companies can be filled, will secure a fair field and good prospects to the comming Company, without in any way projudicing the interests of the Company now monopolising the ground.

The particulars submitted above are sufficient in the opinion of the Directors to satablish than high. It is not, however, solery he safe and good investment that the Directors desire that this enterprise should be rivewed. They feel that their object will be interested in the case of the Company that all who use the telegraph as a medium of rapid communication, are interested in men, that all who use the telegraph as a medium of rapid communication, are interested in the stabilishment of what may be called a competing line. As in the administration of public affairs, a strong, watchful Opposition, is the best security for good and careful that a strong the stabilishment of what may be called an ompeting line. As in the administration of public affairs, a strong, watchful Opposition, is the best security for good and careful for the company, MR. COOFSR, is now in Guelph, and will wait on the business men in order to secure their patronage when the line is working.
