The Golden North!

Previous News from Ingoing Yukoners Confirmed.

The Blockade at Skaguay as Rigid as Ever.

Thousands Camped Along the Trail, Eating Up the Supplies.

The Chilkoot Pass is Open—Reported Richness of the Diggings Confirmed.

Tons of Gold—Flour 800 Per 50-Pound Sack—No Special Demand for Labor.

Juneau, Alaska, Aug. 21, via Seattle, Wash., Aug. 27.—The latest news from the north still confirms all previous statements regarding the Yukon.

Yukoners and their success in getting over the trails. At Skaguay there is found a glutted condition, no progress being made in going over the summit by what is known as the White Pass, it having proved a complete failure this year. There are now between 4,000 and 5,000 persons

CAMPED ALONG THE TRAIL between salt water and up five or six miles. They will remain there, eating their supplies, until spring, or until they make up their minds either to go over to Dyea or return to Juneau or the States. Many have already sold out and abandoned the trip, and some are glad to take 10 per cent of the original cost of their outfits and leaving that part of the trail. Those who started via Dyea and the Chilkoot Pass are getting along very well, since the Indians are charging at present only 25 cents per pound for labor from salt water to the lakes. Under present conditions it is expected that all who are now on that trail will safely reach Klondike before winter sets in.

ADVANCES FROM THE INTERIOR under date of July 24 are a repetition of what has been said before as to the richness of the diggings. The gold worked up to that date; also that some less valuable finds have been made near Stewart River. It is reported that wages remain as heretofore reported. According to recent news from the Yukon water has been running in the purpose, but better arrangements will be provided for these operations next year.

FLOUR 800 A BAG. Flour still selling in the interior for 800 per sack of 50 pounds, and like prices are asked for other staple articles. Miners who were employed in Juneau and Juneau and who went to the Yukon River, have had their places all filled by recent arrivals, so that now there is no special demand for labor here, and it will be worse than folly for a man to come to Juneau expecting to get work during the present season. He should be provided with money enough to take care of himself until spring. The weather has continued favorable for those on the trail, and all together it has been an exceptionally fine and comparatively mild trip in the interior.

TONS OF GOLD. A New York World correspondent at Juneau says: New discoveries and tons of gold is the latest news from the Klondike. It was brought out by John McKay and party, who are on the journey up the Yukon and lakes in 22 days, breaking the record by eight days for the inland trip.

When the steamer Portland arrives at Seattle from St. Michaels, which she is expected to do within a few days, there will not be enough figures on the fever gauge to show the increase in excitement. In her special dining room and under a heavy guard the Portland will carry \$350,000 worth of Klondike gold dust.

When the little Yukon River steamer left Dawson City to connect with the Portland at the mouth of the great river, she had corded up for both deck forward, in sacks like so much wood, that amount of nuggets and dust, taken out of the crevices of the treasure land. A tarpaulin was less thrown over this corded gold, and she was ordered to follow her lines and swung around to follow the river to the sea, amid the huzzahs of a witness of the scene.

A RECORD-BREAKING PARTY. The others comprising the record-breaking party were Archie Schelp and who, as well as McKay, have made several trips to the Upper Yukon country. Their familiarity with the river enabled them to make the journey faster time. The three will return to Dawson City next week. McKay was formerly of Tacoma, Wash. He sold out his business and went on to the Yukon country a year ago last spring. He went to the Klondike after the first rush, but did not get on in good ground. He is interested in another on Hunker Creek. He will not put an estimate on his wealth. He tells a tale of gold that makes the heart jump and the pulse throb, and said: "There is more gold in this country than any man has yet dreamed of."

PROF. JOHN MUIR'S OPINION. New York, Aug. 27.—Prof. John Muir, whose name will always be connected with Alaskan history, has been asked regarding the recent utterances of George Davidson, who said that were the same energy and earnestness devoted to the development of California mines, from San Diego to Siskiyou, California would produce more gold than the Yukon could ever yield.

"I don't think so," was Prof. Muir's comment. "There are thousands of square miles on the basin of the Yukon laden with gold. It is a country which is immensely rich. I can speak dispassionately because I have no ambition to possess any of it. I believe that more gold will be taken out of the great basin of the Yukon, in gold, and great places remain to be uncovered there. The revival of interest in mining in California is due to the fact that the great gold branches of trade has driven men back to the first business they ever learned. With increased interest in the mining, new discoveries follow as a natural consequence, and the fact must always be remembered that the entire coast is a great gold field of varying width and richness. In California the gold is in the western slopes; in Southern Oregon the gold varies and broadens out again, and in British Columbia it is the same, but
