Established 1873. The Weekly Monitor,

ISSUED ON WEDNESDAY, At Bridgetown, Annapolis Co, N. S. M. K. PIPER, Proprietor and Publisher JOHN R. PUDSEY, Manager.

WEDNESDAY, NOVEMBER 23RD, 1898. -As evidence of what local capital and enterprise can do, the Nova Scotia Carriage company, of Kentville, forms a striking example. About three years ago this company entered the field in competition with the ufacturers of the upper provinces, who were flooding the province with their wares, and have so far succeeded that their stablishment, which employed about thirty men at the start, has become too small for er one is now being built. New capital, attracted by the success of the business, has Thursday. been added, and in a short time the com pany will be in a position to increase its output fourfold. This comment, which may be news to many of our readers, is not made as an advertisement of the company mentioned, out to more thorough'y awaken the people of Annapolis county to the fact that the manufacturers of Ontario and Quebec are Scotia markets, and that local enterprises are gradually entering the field as successful aritors All this is for the provincial good, and every increase in our manufacthat increases population, builds cities, and promotes prosperity.

-The Imperial government is being watched closely and with awe by the great nations of the world whose commercial inof Great Britain. The Fashoda affair with France was apparently settled by the recall of Marchand, but British war-like preparations continue unabated and the cause for this extraordinary arming has not yet transpired. That it means much goes without saying, but against what power are these then it is certain that the Fashoda incident and the West Africa troubles have so irritated the British ministry that it has challenged Frenchmen to make another hostile move at their peril. Seldom, indeed, has a hasty national arming been conducted with such general secrecy as to the real significance of the movement. Neither Salisbury nor Chamberlain, in their fighting speeches, have bared the trouble, and no official inpiration has reached even the British press. The mere continuance of British naval power has been amply provided for in the ordinary may nearly measures must indicate that the ministry is forwarned that troublous times are at hand.

—Lord Minto has signed an order in council suspending until 1900 the recently promulated order-in-council preventing the taking of lobsters of less size than $10\frac{1}{2}$ inches, and restores the size limit to $9\frac{1}{2}$ nary naval estimates, and the present extra-

districts of Nova Scotia, which is printed elsewhere in this paper, shows how favorably our mines compare with those of Oatario, and a prospective glance to a period of capital shall have revolutionized the exist- | sail from Annapolis for Porto Rico. Ing condition reveals a pleasant though imaginary picture. It is quite possible that in a very few years Nova Scotia will be one vast mining camp, and perhaps the richest in the world. Mines that are now paying dividends, if conducted on the same scale as those of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Columbia, for instance, would be a score of British Charles of British Columbia, for instance, would be a score of British Charles of world. Mines that are now paying dividends, if conducted on the same scale as those of British Columbia, for instance, would no doubt produce results infinitely greater than under present methods of working.

The heavy mining deals that have been cone. The heavy mining deals that have been made in the province within a few months The heavy mining deals that have been made in the province within a few months indicate that the old order is giving place to the new, and mines to that are now paying dividence on a few thousands of invested capital, will be forced to an hundred fold increased output.

fixing upon two outward and two homeward | enterpris routes to be pursued by their steamers, that will lessen the danger of collision in the beaten paths of trans Atlantic shipping. This move shows that recent disasters have thoroughly awakened them to the necessity of exercising a weeter visibnee in protect. of exercising a greater vigilance in protecting their own property and the lives of their patrons. The day has not yet come when speed will be sacrificed for safety, but there are many things that may be done to add to the safety of the ocean greyhounds in their of exercising a greater vigilance in protectthe safety of the ocean greyhounds in their the safety of the ocean greyhounds in their flights against time, and the recent conference of steamship men has given prominence to mot the least of these. The new regulation will practically give the big liners a right of way over tramp steamers and sailing vessels, way over tramp steamers and sailing vessels,

—The directors of the Pork Packing Company are rushing the preliminary work in connection with the enterprise as fast as of circumstances will permit. A report of the business done at their last meeting is published in another column, and it shows that progress has already been made. The erection of the building and the installation of the building and the installation of the plant will be effected in a few months and farmers should prepare now to furnish the furnish and farmers should prepare now to furnish the furnish and farmers should prepare now to furnish the furnish furnish the furnish furnish the furnish furnis rogress has aready been made. The erection of the building and the installation of the plant will be effected in a few months and farmers should prepare now to furnish the supplies that will be required. If the local supply of hogs is inadequate to the calpacity of the plant and the requirements of the trade, the successful conduct of the box.

—The Bay Shore compares badly with the Valley as a fruit growing section, yet Mr. Robert Chute, of Hampton, picked 70 barels of apples from his orchard this year. A spring's pig weighing 347 lbs. and a turkey of 15 lbs, are other samples of his thrift as a farmer.

—In the cron report for the requirements of the trade, the successful conduct of the box. the trade, the successful conduct of the business will be seriously hampered. Farmers are interested in this enterprise and must co-operate with the management, if the full benefits of its establishment are to be realized.

—In the crop report for the past season, just issued by the Secretary for Agriculture, Annapolis County crops are listed as follows: hay, 105 per cent; ensilage, 100; oats, 90; barley, 93; buckwheat, 86; beans, 100; pess, 92; potatoes, 108; mangels, 111; turnips, 113.

The Supreme Court of Nova Scotis, at a recent session at Halifax decided a very important question relative to grand juries, holding that while it is within the power and competency of the local legislature to reduce the number of grand jurors, that reduce the number of grand jurors, that being a matter of constitution and organization of provincial courts, the Dominion parliament can alone enact how many grand jurors can find a true bill of indictment. The case calling forth the above ruling was one where ten jurors found a true bill utder a section of the last act of the local parlia-

one where ten jurors found a true bill ut der a section of the last act of the local parliament, and the Supreme Court held that the fluding was illegal.

—Mr. Daniel Cameron, a well known farmer, died at Annapolis last Sunday at the advanced age of 79 years. Deceased came from Pictou county many years ago and settled at Round Hill; a lew years ago and settled at Round Hill; a lew years ago have years ago in the past season, the farmers of Nova Scotia harvested on an average ninety per cent. of a full crop in the chief products of the farm. Hay runs 7 per cent. above the full crop average. Annapolis county makes a good showing in the report, though there are many of our farmers who will dispute the correctness of a 108 per cent. potato crop. But two other counties in the province claim anything like such a yield—Richmond 95 and Digby 91—the province laim fing to about 63 per cent.

Deeds of land from C. Or Foss, Owen Wheelock and R. H. Chipmau were laid before the directors. The President was requested to obtain a change in Mr. Foss deed granting the company the privilege of draining through his land.

T. R. Jones submitted an agreement with the Water Commissioners of the Town of Middleton granting the company a free wa-

the Water Commissioners of the Town of Middleton granting the company a free water supply for a period of five years. A motion was passed requesting the commissioners to extend the time to ten years.

The question of the treasurer's bond was discussed and it was decided that the treasurer give a bond from a guarantee company. The offer of F. F. Judd, of Boston, in reference to plans and specifications and the erence to plans and specifications and the erection and equipping of the factory was considered the most favorable of those received. Mr. Judd offers for 5 per cent of the entire cost to furnish plans and specifications uperintend the erection of the building, bu superment the erection of the building, buy and place the machinery and give all required information in connection with the starting of the factory. Mr. Judd was invited to meet the directors at Middleton on the 24 inst.

The secretary was instructed to obtain at once plans and specifications for decimage.

once plans and specifications for drainage from Mr. C. O. Foss and to call for tenders for building the drain, to be handed to Mr. A. J. Morrison, of Middleton, or Mr. E. D. Davidson, of Bridgewater, before 10 a. m. on Nov. 24th.
Mr. G. W. Andrews submitted his resig

antion as a director and suggested that Capt.

Amos Burns be appointed in his stead. The resignation was accepted and Capt Amos Burns appointed to the vacancy. Mr. G. W. Andrews was appointed secretary to the board of directors.

Self Denial.

The Salvation Army's special work of Self Denial now an annual institution wher-ever the Salvation flag is hoisted, will be held throughout this province from Nov. 27th to ever the Salvation flag is hoisted, will be held throughout this province from Nov. 27th to Dec. 3rd. The public are by this time well acquainted with the purposes which actuate the effort, its aim being to supply by means of self denial, additional sinews of war. Part years have proved the financial harvests which have been reaped for the work by the concentration of the srmy's consecrated workers to the scheme. Indeed results have been realized which hould surprise any but been realized which would surprise any but hose who are informed as to the detailed those who are informed as to the detailed devotion and hard work of the Salvationist. But the army is a rapidly developing movement and such success has been more than swallowed up by its wide spreading branches of effort. Therefore Self Denial week has again been organized to meet the long standing and additional claims. All who recognize the work which this organization is doing both for the spiritual and social well being of mankind are asked to co-operate. Special meetings are being held at the army's local hall, houte to house collecting is being systematically carried out and such a network of machinery is now in motion as seems to foretell the achievement of another substantial outcome to this good work. Contributions for the effort are received by the officer in charge of the local corps, whose address is Capt. Parsons, Bridgetown.

S. A.

The Dominion Coal company will min

It is stated that the presence of Henry M. Whitney in Cape Breton at the present time has to do with the discovery of valuable deposits, of ore from which specular pig iron or speigel is manufactured. The tests show the ore to be of the best quality. The deposit is said to run a bigh as \$600. posit is said to run as high as \$400 per ton. Speigel is used in the manufacture of Bessemer steel.

Rich Nova Scotla Gold Mines. Halifax, N. S., Nov. 19. - Alexander Ros

Halifax, N. S., Nov. 19.—Alexander Roy, the Toronto chemist and mining engineer, has just returned from a trip to the Ecum Secum and Salmon River gold districts. Mr. Roy says: "I have visited many mining districts, but never before have I been able to walk along the outcrop of a vein and find samples of the free gold at every few feet. I have never before seen such a magnificent example of a typical mining district. You have here in Nova Scotia without doubt the richest gold mining camp in the world, and it is only a matter of capital and proper mining methods to make it one of the greatest, if not the greatest, mining country in est, if not the greatest, mining country

"The methods at present employed are one hundred years behind the times. Some —Mailer's Custom Made Suits at \$9.50 are corkers; fit guaranteed. Come along and get one.

Ii

WANTED—Any quantity of good Butter. Also will pay 20c. per dozen for fresh Eggs.

J. E. Burns.

—Don't believe what Mailer's opponents qodies of ores there, but they only avera from \$3 to \$7 to the ton, and here I find y say, but come and be convinced that he sells

cheapest.

-L. D. Shaffner's new stock of Raisins, Currants, Citron, Orange and Lemon and all kinds of Spices, Essences, etc., is now complete, and he would ask you to see the quaitity and get prices before buying elsewhere.

-Having contracted to supply a large quantity of Eggs and Butter this month, and tearing we will come short, owing to the very bad weather and roads, we have decided to pay for the next week only, 24c, per dezen for good fresh Eggs, and 20c. per lb. for good Roll Butter.

The company the property of the ton, and here I find you have reyr ich veins, while the surrounding rock for from three to five feet carries as much as our veins do.

'It is true there are very rich pockets to be found in the veins, but it is only in. first. claim is two feet wide and can be traced by the inclination of radistance of fifty acres while the inclination of the surrounding rocks show it to extend to over a depth of on having sufficient ore to keep a one han destamp mill going for a century.

There is plenty of room for the investon having sufficient ore to keep a one handred stamp mill going for a century.

"There is plenty of room for the investment of outside capital. It is a mere matter of getting things going. There are a large number of mines here, which, if developed on the proper scale would pay \$100,000 to \$200,000 for years, and those mines could then be sold readily for the amount of money that this yearly return amount would pay five per cent. interest upon.
