

Seeds From Specialists

THE Seed Business is highly specialized. Seeds that will grow have to be carefully selected and tested. Our experience of over **50 years** has convinced us of the importance of the proper testing of seeds—particularly with regard to vitality. Recognizing this, we have spared no expense in procuring seeds that will germinate, and will prove true to name.

We have each variety grown in that part of the world best adapted to its proper development—by the most experienced growers. On arrival, we immediately test them, and the seeds which do not pass a very high standard are rejected.

OUR ILLUSTRATED CATALOGUE for 1910

Our **Illustrated Catalogue for 1910** is now ready, and is free to all who send for it. This **CATALOGUE** is the best arranged, and contains the most comprehensive list of **Flower, Vegetable, Grain and Root Seeds**, of any in Canada. It contains numerous reliable cultural directions, and a mass of information of interest to Horticulturists. Lists of **Plants, Bulbs, Trees and Sundries**, combine to make it a veritable *vade mecum* for everyone who aims to produce good crops.

Where all are excellent, it is difficult to particularize, but we mention the following as being worth attention :

IN FLOWER SEEDS

ASTERS—From the home of pure Aster Seed. Germany.

PETUNIAS—Giants of California—re-selected seed from a specialist in California.

PRIMULAS—Chinese—From famous French hybridists.

PANSIES—Our Giant Strain is replete with color and markings not found in other strains.

NASTURTIUMS—Both Tall and Dwarf Sorts. The colors range from Creamy White to Intense Dark Browns.

PHLOX DRUMMONDI—This Hardy Annual in the many distinct shades we stock is a revelation to gardeners.

SWEET PEAS—Our Gilt Edged Mixture is produced by mixing the numerous exquisite named varieties in our list. We stock only the best.

IN VEGETABLE SEEDS

BEANS—Simmers' Giant Wax Bush or Butter.

BEET—Simmers' Extra Early.

CABBAGE—Simmers' Early German Brunswick.

CAULIFLOWER—Simmers' Gilt Edge.

CORN, SWEET—Simmers' First of All.

CUCUMBER—Simmers' Improved Early White Spine.

LETTUCE—Simmers' Nonpareil.

ONION—Large Yellow Globe Danvers.

PEAS—Simmers' First of All.

TOMATO—Livingstone's Coreless.

NOTE.—Our Seeds are grown by **Experts**.

They are **Tested** by **Experts**. A Trial Order will convince. Prompt Attention given to the smallest as well as the largest

orders.
