

THE NEW VANCOUVER COAL MINING

AND LAND COMPANY, LIMITED

(FORMERLY THE VANCOUVER COAL CO.)

ARE THE LARGEST COAL PRODUCERS ON THE PACIFIC COAST

NANAIMO COAL.—Used principally for gas and general domestic purposes.

SOUTHFIELD COAL.—An unequalled steam fuel.

NEW WELLINGTON COAL.—A bright, clean burning coal and a favorite fuel for the open grate.

PROTECTION ISLAND COAL (Upper Seam).—This coal is similar in appearance and quality to the New Wellington, but is a superior gas coal, and for general purposes will be preferred to all other coals produced on Vancouver Island.

The above coals are mined by The New Vancouver Coal Company only.

The Company's wharves are at Departure Bay, Nanaimo and Protection Island, at each of which ships of the deepest draught can load at all times.

SAMUEL M. ROBINS, Superintendent.
