

BEEF PEPTONIDS !

A Concentrated Powdered Extract of Beef Partially Digested and Combined with an Equal Portion of Gluten.

We have pleasure in presenting, for the consideration of the Medical Profession, "BEEF PEPTONIDS." We consider this product the most valuable that ever emanated from our Laboratory, and we feel confident it will be welcomed by the Profession in all parts of the world.

BEEF PEPTONIDS contains *only* the *nutritious portions* of the beef. It contains *no water* and *no inert matter* of any kind. We combine the dry Extract of Beef with an equal *portion* of Gluten to prevent a tendency to deliquesce, and in order to present the preparation in a powdered and portable form. It is well known that Gluten is the most nutritious substance found in the Vegetable Kingdom, and in nutritive elements is closely allied to Beef.

Four ounces of BEEF PEPTONIDS represent as much nutritive and stimulating properties as forty-eight ounces of the best lean Beef.

Four ounces of BEEF PEPTONIDS contain more nutritive elements than ten pounds of any extract made by Liebig's formula, and from four to six times more Albuminoids and Fibrinoids than any Beef Extract ever offered to the Medical Profession.

Our machinery and process for the production of BEEF PEPTONIDS are perfectly adapted to the *elimination* of all inert portions of the Beef, and the *retention* of all the nutritive constituents.

BEEF PEPTONIDS is *much less expensive than any other preparation in the market, as it contains neither water nor inert matter.*

The favour our preparation of BEEF PEPTONIDS received at the hands of Drs. AGNEW, HAMILTON, BLISS, REYBURN, WOODWARD, BARNES, etc., the corps of eminent physicians who employed the preparation with so much advantage in the treatment of the late PRESIDENT GARFIELD proves conclusively its great value as a food.

Great care is exercised in selecting the Beeves, and none except the most healthy and suitable are employed in making our BEEF PEPTONIDS.

DIRECTIONS FOR USE.

FOR AN ADULT.—*From a teaspoonful to a desert-spoonful, added to a cupful of boiling water, and salt to the taste. Children in proportion.*

It may be given as often as required, say three to six times a day. If preferred, it may be added to soups or other liquid food. In the event of the patient's stomach being in a weak condition a larger quantity of water should be added to the BEEF PEPTONIDS, and administered in teaspoonful doses.

For further particulars please address our Canadian Branch.

Very respectfully,

REED & CARRICK

NEW YORK.
