

distribution underground cable subscriber carrier system and is presently bidding on a project management contract for an external cable system in the Seria exchange area. In September 1987, Brunei decided to purchase for CDN \$800,000. a meteorological satellite reception and analysis system from MacDonald Dettwiler. This MDA system is to be operational by September 1988.

Although two officials from Brunei did participate in the ASEAN MTN study visit to Canada in October, Brunei is not a member of the GATT, and will not play a direct role in the current MTN round.

### CANADIAN MARKETING OBJECTIVES

1. Fisheries: Technical assistance to organize and implement an aquaculture program in Brunei. Study of the present use of fish resources with a view to examining the potential for processing and export.

2. Forestry: Feasibility study on the development of tree plantations. Interest has also been expressed in more detailed information on nursery techniques, saw-milling, and kiln drying operations (not using steam boilers).

3. Communications and Informatics: Opportunities appear to exist for the supply of a cellular telephone system, telecommunications management consulting services, provision of an automated library system, mechanized passport control system, and broadcasting equipment and training services.
