A policy written for one year, dated January 1st, was, on the 10th of April next ensuing, reduced in amount onehalf, and the remainder extended 18 months. When will the policy expire?

Solution: - From January 1st to April 10th are three months and 9 days, plus 18 months extended time, equals 21 months and 9 days; the expiration will be October 9th of the second year.
