PETITION FOR MRS. TRENCH

East Torontonians Want Her to Be
Postmistress—Business Boom
ing—Minor Notes

East Toronto, Nov. 18.—(Special.)—The Kingston-road is to be paved up and muddy that farmers, while in the town, drive on the clatter path, which has now become little better than a river, but it is under-standable that the authorities will not act in haste, but will wait until the summer of next year.

Business is humming at the depot. New men are being taken on every day, the last additions to the staff being five men—Bly, Clark and Kirk. There were 500 men in the yards today, and no more to move the yards to the depot.

The people of Little York can scarcely understand the outbreak of the late week when the council granted them gravel and a new sidewalk for Daw's-road. The road was in a state of mud, and the new sidewalk was a great improvement.

William Kerr, a Grand Trunk freeman of East Toronto, was removed to the General Hospital on Thursday on the recommendation of Dr. Scher. He is suffering from pneumonia. There are two cases of pneumonia in the town and two at North York.

The outbreak of the disease is without local precedent. Both Liberals and Conservatives are keenly signing a petition to the Postmaster-General asking that Mrs. Trench, widow of the late postmaster, be appointed to the position.

The new Baptist Church will not be finished by Thanksgiving Day, and consequently the opening service will have to be postponed. When completed the building will not have one cent of debt against it.

At North York Hotel are the light-weight boxers, Jimmy Smith and Tommy McKewen, with their trainers, Gallagher and Smith. They are preparing for a bout on Thanksgiving night in the Crescent Park, Toronto.

FIGHT BEHIND PRISON BARS.

Desperate Attempt by Two Convicts
to Escape From a Columbus
Prison—A Guard Killed.

Columbus, O., Nov. 18.—There was a desperate attempt made by two convicts to escape from the penitentiary about 8 o'clock this morning, as a result of which Guard Charles B. Lauterbach of Mt. Vernon was shot and killed, while Convicts O'Neill and Atkinson received injuries of a serious nature, and both are now in the prison hospital.

By some means Convicts O'Neill and Atkinson, who are serving 15 years each for robbery committed in Cleveland, obtained possession of a revolver and proceeded to carry out a bold plan to escape. One covered his face with a handkerchief and went into the broom shop, where he held up Guard Lime and took his revolver. He then returned to the hoe shop, where the other man joined him, and they opened fire on Guard Lauterbach, who was in charge of that department. The guard came on the run to the prison, and shot three times and almost instantly killed. The sound of the shooting started the other officials in a glance opened fire on the two prisoners. This was returned and a regular battle was in progress until the revolvers of the participants were emptied. In the fray Convict Atkinson was shot down and seriously injured, and as soon as guns were emptied Guard Gump rushed forward and shot and almost shot O'Neill to death before the prisoner would surrender.

The other prisoners in the shop where the shooting occurred took no part in the affair, but it is understood they stood ready to follow if the efforts of the two leaders proved successful. Previous to making the third man to place a ladder against the outside of the penitentiary wall, so that when they fought their way out of the shop they could shoot down the wall guard and make their escape by that route.

A High-Grade Semi-Bituminous Coal
It is a long haul to bring coal from West Virginia to Toronto, but the superior qualities of the famous Pocahontas semi-bituminous coal of that district warrant the expense of doing so. The supply of this coal is very abundant, extending over a territory of about 300 square miles, and it is estimated that an output of 10,000 tons a day would exhaust only one acre daily.

An analysis of Pocahontas coal shows that it possesses 81.10 per cent. of carbon matter, an extremely high showing. At the same time it contains 1.50 per cent. of hydrogen, 1.50 per cent. of oxygen, 1.50 per cent. of nitrogen, 1.50 per cent. of sulfur, 1.50 per cent. of phosphorus, 1.50 per cent. of iron, 1.50 per
