seven o'clock. Personally I have never altogether approved the Eng-lish usage in its entirety. The decollete gown never seemed to me in quite good taste for the rather mixed assemblage of a public dining-room; and, further-more, it leaves nothing in reserve to mark the greater formality of really important and brilliant affairs. The real semi-decollete gown, when it is not called upon to be ambidextrous or amphibious, or whatever you would choose to call a poor dress that is ex-pected to look equally well in daylight choose to call a poor dress that is ex-pected to look equally well in daylight or lamplight, is a genre quite as apart from the decoletage as from the day gown. It has a bodice that may be as low-cut in the lining as a full de-colletage, but the neck is discreetly velled with diaphanous tulle or lace. It need be no lower, necessarily, than the little Dutch low-neck waists or collarless frocks that are so general on our beaches or even in remote coun-

the little Dutch low-neck waists or collarless frocks that are so general on our beaches or even in remote coun-try districts in the summer-time; cer-tainly nothing that the most conser-vative person could criticize as expos-ing or conspicuous in the slightest de-gree. It is simply a concession-this semil-decollete gown-to the little nice-ties of life; a recognition of a conven-tion that is old enough to be orthodox, if centuries of usage count for any-thing. And for once we have stumbled on

thing. And for once we have stumbled on a fashion that is really an economy; for, instead of having to have a high-backed gown for the theatre and a semi-low backed gown for an informal dinner, a woman now needs but the one dress for both occasions. The theatre dress has been entirely eliminated... From the January Delineator. In Society. In Society.
