Paris, March 19 .- The German line

at last accounts was in full retreat

over a section which represents al-

most one fifth of the vast front from

Switzerland to the sea, closely pressed by the French and British. French

troops, advancing with the precision of a machine along a 40-mile front

have recaptured important towns and many square miles of territory, ac-complishing this at small cost to them-

selves, so carefully has every detail of the advance been thought out. In the Lassigny region west of

Roye the Germans appear to have made only a weak defence, since the

French were able to push forward 13 miles at one bound. Gen. Nivelle, the

French commander, who is credited

with possessing almost uncanny ability to gauge the powers of his opponents, is following up the retreat-

ing Germans with great rapidity. It is regarded here as doubtful whether

This was the first communication the embassy had received from the Russian capital since the revolution.

It was submitted to Secretary of State Lansing without comment or request for any action in the way of recognition, pending further instructions from the Russian foreign office. It is understood that the status of the embassy here will remain unchanged for the present at least. New credentials ultimately will be required for the head of the embassy however, regardless of who it may be as a consequence of the change in government.

The comment on the military aspect of the situation is moderate and even cautious, Le Petit Parisien be-lieves that the rapid retreat of the Germans very probably conceals some design, but that there can be no doubt that, notwithstanding the great confidence inspired by Von Hindenburg the German public will learn with stupefaction of the evacuation of a region where so many Germans have

fallen.
"The spirit of the population and troops," says this paper, "will be affected, and to wipe out this bad effect it will be necessary to attempt some operation on a vast scale. This will certainly be undertaken at a date which cannot be far off."

The plain into which the retreating

forces have gone is on a much lower level than the evacuated positions. South of St. Quentin it is only 246 feet above the sea level, at Cambrai, 157, at Douail, 78, and at Lille, 59. This is in contrast to the positions held at such places as Pozieres, where the ground is 600 feet above

The mayor of Noyon, Senator Noel, director of the Ecole Centrale, the great government college for civil engineers, upon learning of the deliverance of his city, announced his intention, althe unwell, of returning to his post today.
