Promise Made That After War Government Intends Giving Consideration.

#### **ONTARIO OUTDISTANCED**

Alberta and Manitoba Cited by Deputation as Having Made Great Progress.

Premier Hearst promised a woman's suffrage deputation yesterday morning that after the war the Ontario Government intended giving active consideration to the equal franchise issue. He told the score of women who waited in him that in snite of the declarations of the suffragettes to the contrary there was a distinct branch of the women of Ontario who did not want the vote. Dr. Stowe Gullen interjected that there was no organized body of women opposed to woman's suffrage to which the premier replied. "I wish you could see some of the

Of late attempts have been made to construct aeroplanes of a transparent material, at least for all purposes material, at least for all purposes where a canvas covering is used at present, such as the wings and the luselage. One of the latest ideas of the kind is said to be an areoplane which uses noninflammable celluloid for the wings and other parts, and when flying at a few hundred feet ele-vation the apparatus is quite invisible according to reports. A new mufflin, box on the motor serves to deaden the sound. One advantage of the transparence is that observations can be

Most thin, rundown men and women would probably be glad to increase their weight with ten to twenty-five pounds of good, firm, solid, healthy, stay there flesh and fat if they believed it possible to accomplish such result by merely making the flesh-making materials in their daily meals do a little more work than they are doing.

This is said to be the chief reason why most thin people do stay under-weight. They are so constituted that they fail to fully assimilate the nourishment of their food, a great deal of which passes from the body as waste. Increase assimilation to normal and normal weight follows as a matter of course.

For immediate wear tailored sailors re in very good taste, as are the closefitting chapeaux with high flare brim extensions. The use of ribbon is as varied as the colors employed. One popular mode of trimming the small, close tailored model, is to cover the crown with silk ribbon in the identical shade of the straw used, which is again used as a pleated "collar" in place of the straw brim. A small odd-ly colored ornament, which is a hat pin in disguise, lends the only note of color. Tete de negre—sometime known as jungle brown- is another fa vorite for immediate wear, and a hat of this shade is particularly attractive when a touch of coral is introduced. A very handsome little model with a smartly flaring "high-backed" brim, is underfaced with matching silk and has for its ornament two little cora pompoms with brown "feelers" curling high at an angle from the crown.

Miss Neelin, Returned Nurse, Says Visit to Hospitals Would Be Evidence Enough.

Miss Neelin, a returned nurse, said, t the King Edward yesterday, that there was no doubt about the German atrocities. Men had come back from the German camps with limbs amputated where there was no necessity for such operation, and the brutality of the treatment was increased by the fact that no anaesthetic was used to p.epare the patient for the operation. It was only necessary for some of he people over here to cross the water to make them realize that this is a war for right, justice and humanity, said Miss Neelin. In the French convents were Belgian children who had been horribly mutilated by the Germans.

Miss Edith Neelin went over with the second contingent of nurses May 1 last on the Hesperian, which was only twelve hours behind the ill-fated Lusitania. She was sent to Shorncliffe when the hospital was opened, and had been on constant duty until sent home to recuperate. Miss Neelin expects to return to the front shortly,
