COUNCIL URGED TO **CONSIDER BATHS**

RECOMMENDATION OF TOURIST ASSOCIATION

Ald. Barnard Moves to Have Outside Sewerage System Prepared by the City.

Two matters of special interest arising at Monday's regular meeting of the city council were a request coming from the president of the Tourist Association urging for the establishment of sea baths somewhere along the foreshore of Dallas road and a motion from Ald. Barnard recommending that some systematic policy be adopted by the aldermen for the carrying out of sewerage work beyond the aits set forth in Mr. Mohun's plan. The communication from the Tourist Association was as follows:

Gentlemen :- The one thing lacking to make Victoria an ideal summer residence is the want of facilities for sea-bething Residents of this city feel this want very keenly, while visitors and tourists, especially those from inland places, are litterly disappointed upon discovering that while surrounded by the sea there is absolutely no place at Victoria where sea-bathing may be enjoyed with comfort. From a sanitary point of view this want of bathing places is a serious matter, and the necessity for such establishments is recognized by the municipal authorities in nearly every city and town in Canada, which supports them out of the public revenue. The numerous letters which have appeared from time to time in the city newspapers advocating the establishment of public baths, prove the establishment of public baths, prove that the weight of public opinion favors are astimuted as the della asthort. such action on the part of the civic authorities, and there can be little doubt that were the question submitted to a vote of

affirmative by a sweeping majority. officers of the Tourist Association have devoted considerable attention to this as follows: matter, and have endeavored to interest private capital in establishing baths, but without success, the opinion seeming to prevail that the city should follow the example of Vancouver, and provide bathing places in the interests of public health, as well as an attraction for strangers. In the course of their investigations the officers of the Tourist Association ascertained that, within the limits of Beacon Hill park, there are several sheltered bays which might be utilized for bathing places at a small outlay. Of these a small bay fying near the western boundary of the park and adjacent to Dallas road, is considered the most sultable, and they have had an estimate made which shows that this bay could be made available for baths at an outlay of, say, \$1,000, including dress- section affected, and did not expect to in-

body to appoint a committee to inquire the city at large. Anto and report on this subject of free Ald Dimada's said in seconding the

CHAS. HAYWARD, President Tourist Association.

Ald. Vincent approved of a suggestion from the Mayor that the matter be referred to a committee and this course was agreed to, Aldermen Grahame, Vincent and Stewart being named as the

Ald. Cameron, in reference to the question of warming of the water, said that the idea of the association was to keep the portion of the sea back for a time and in this way the water could be heated.

President Wood, of the Victoria Termal Railway Company, gave notice that they had completed the terms of ir agreement with the city and invited the Mayor and aldermen on a trip of inspection. Accepted with thanks.

F. J. Richards once more drew attention to the nuisance at the corner of Blanchard and Johnson streets. Referred to the city engineer with power to act if the nuisance is found to be on the public streets. Chas, W. Plumb asked that the city

remove two trees in front of his resi dence at No. 13 North Park street, which were causing his house to be dark and damp. Referred to the city engineer for report

J. L. Raymur, water commissioner, reported as follows:

The meeting was well attendlocality, Harrison street and upper Pai- ed, there being about thirty present. The 3. Resolved, That certain projecting rosk with prayer by Right Rev. Bishop

As will be seen by the reports of the different officers, the Orphanage is now ciear of debt, the \$6,200 mortgage which has been a great incumbrance to the institution has been paid off, and after meeting all other expenses in connection with the Home, there is a surplus of \$1,800, which is very gratifying, especially to those in charge.

In speaking of the recommendation the matron, as given in the president's report, of having a suitable married man to have especial care of the boys, and to superintend their manual training, Mr. Marchant stated that the idea was a most excellent one. The boys would then be taught a trade so that when they entered the world they would rely upon their own resources. Mrs. F. W. McCulloch, president of

the ladies' committee, said that al-though the idea was a good one, she was the only sewage work the city at present of the opinion that as the work of the matron was too burdensome for one perportion of the city covered by the plans | son, there should be extra help for her immediately, at any rate before anything In explanation of the statement made
