A HUMAN MATCH FACTORY.. The body of the average man contains phosphorus sufficient to make 483,840 matches, enough to fill about 6,000 boxes, allowing eighty matches to the box. Phosphorus is one of fourteen elements entering into the composition of the body.

ments entering into the composition of the body. It is divided among the bones, flesh, nervous sys-tem, and other organs. Without phosphorus the brain would be weak, the body feeble, and the bones would disintegrate leaving man a squidgy invertebrate squirming in the dust. The perfect health of the human body requires a perfect bal-ance of the constituent elements of which it is com-posed. The cathen iron line with La Grippe and in ortseem to regain my strength, so as to be able to take up my work again. Took many so-called tonics, but it was just so much money thrown away, until I began using Dr. Pierce's Golden Medical Discovery. Within a week after using that I was able to be ground again, and I found that my sys-tem was entirely free from any of the bad effects which usually follow a case of La Grippe. I now which usually follow a case of La Grippe. I now posed. The carbon, iron, lime, sulphur, sodium, keep a bottle of the 'Golden Medical Discovery' on hand, and, when I catch cold, take a few doses, etc., must all be replaced as they are used up in human energy. Take all the iron from the blood and the circulation stops. That's death. Change the proper proportion of these substances to each destroy their natural balance in the body, other and you destroy the balance of health.

# THE FOOD WE BAT.

It is extraordinary the awakening that Where do these essential elements of vital force come from? From the food we eat, How are they extracted and distributed to the several organs they sustain? They are extracted and dis-tributed by the stomach and other organs of di-wery serious and needing immediate attention, on mention and mutrition. What have a several account of overwork and needing immediate attention, on has lately taken place in all parts of this preservation of game birds and game tributed by the stomach and other organs of di-gestion and nutrition. What happens when the stomach is "weak?" The food is only partly digested and assimilated. And then what? Then the balance of health is destroyed and there's blood "trouble," nerve "trouble," lung "trouble," heart "trouble," or some other "trouble" with the vital organs of the body. Pain is the hunger cry of the starved organs. What then is the logical first step to health?

Put the stomach and organs of digestion and nu-rition into a condition of sound health. That is just what is done by Dr. Pierce's Golden Medical Discovery and that is just the secret of the many marvelous cures effected by this remedy. No medicine can make fat or flesh. Food alone can make them. Only the stormach and its clical BLOOD AND COURAGE.

marvelous cures effected by this remedy.
No medicine can make fast or flesh. Food alone can make them. Only the stomach and its allice. "Nerver foods," "blood-making" medicines, are mere fads and fallacies. The stomach and organs of digestion and nutrition prepare and distribute the food.
Dr. Pierce's Golden Medical Discovery is not a cure-all. It does one thing. It cures diseases of the stomach and organs of digestion and nutrition. The rest Nature does. Nature feeds the nerves, enriches the blood, heals the lungs and restores the failing vital powers. "Golden Medical Discovery" only removes the obstructions disease has put in Nature's way.
There is no alcohol in "Golden Medical Discovery" any other narcotic.

On the whole conditions throughout Canada, in the view of the chairman, appear to be satisfactory, and while in some branches of industry there is room for improvement, business is generally on a sound and substantial footing.

WHY JAPAN SUCCEEDED.

At last the secret of Japan's unexampled success has been revealed. There have been several hints thrown out upon the subject, some of which have caused resentment in circles which, it appears to us, should have received them with 17th of March, which, as all enlightened people know, is St. Patrick's Day, said that Generals Oyama and Uku were descendants of Irishmen, and proved his proposition by calling attention to the

names in the place where they comobvious modification from the original menced recruiting, that is certain. The royal nomenclature. "Mr. O'Hara, whose given name was Patrick, left Ireland during the Elizabethan era for France, but was shipwrecked in the Bay of Biscay, and rescued by a Spanish ship bound for the Philippines. He was taken there and cast adrift. His descendants went to Japan and turned naturally to the career of fighting men. Intermarriage with the natives gave them standing and position close to the Mikado, which was advanced by their activity in military affairs, and the name finally became Ovama, General Oku's name originally was O'Keough, who, though a military genius, was a poor hand at spelling. The rigors of the Japanese alphabet proved too great for him, and by Imperial edict he was given permission to cut out a
