

## May Reconsider Early Claims Re Pacific

Jap. Publicist Cites Examples  
in Connection With Political  
Situation in Far East.

Tokyo, Sept. 15.—If the present political situation in the Far East is related at the Washington conference, then earlier acts of powers affecting the Pacific should also be reconsidered. This follows Japan's contention in its reply to the United States that questions regarded as accomplished facts should be avoided at the conference.

Professor Matsunami, an authority on international law who was a delegate to the conference, insists for example that the Panama Canal should be placed under international control for the benefit of the world.

He declares that if the conference takes Japan to evacuate Siberia and to abandon Korea and Manchuria, it should also ask the United States to return most of the United States to the Indians and grant independence to Hawaii and the Philippines. Great Britain, he added, should then make Canada and Australia completely free and return Hongkong to China.

Apprehension of drastic revision of Japan's position in the Far East which are finding renewed expression are believed to be the inspiration of comments like these.

The Yozuda says it is convinced that the conference will place Japan on the "chopping board." It fears that the demands on China will be annulled and that Japan will be forced to evacuate South Manchuria.

He attacks American annexation of Hawaii and the occupation of the Philippines, condemns British policies in India, South Africa and China and warns its millions of readers that the white race looks upon the world as its exclusive possession and regards colored people as brutes.

Japan therefore, the Yozuda holds, should take the offensive at the conference and probe past acts of the white nations whose footsteps Japan has merely followed.

## 700 Reindeer For Baffin Land

Beginning of Fulfillment of  
Plans Suggested by Explorer  
Stefansson.

Christiansburg, Aug. 22.—(By Mail.)—A representative of the Hudson Bay Company recently paid a visit to Pinemark on behalf of the Canadian Government and bought a herd of 700 reindeer which are to be shipped to Baffin Land.

A number of Laplanders were also engaged to take care of the animals which will be despatched in September.

A plan covering the Arctic and South Arctic regions of Canada into a great wool, milk and meat producing area was presented to the Canadian Government by Vilhjalmur Stefansson, the Norwegian explorer of the Canadian Arctic, more than two years ago.

His project involved the introduction into the Canadian north of large herds of reindeer and also the domestication and development of great herds of musk ox. He estimated that there were from 1,000,000 to 2,000,000 square miles of land available for grazing in a climate too severe for cattle, but where reindeer and musk ox exist all the year round. In proof of his argument, he cited the introduction by the American Government of reindeer herds into Alaska.

The explorer declared that the growth of these animals in the far north would help to solve the food shortage then existing.

The Canadian Government appointed a committee to investigate his project. It was represented that there is an abundant growth of vegetation in the Arctic regions of Canada in the summer and that the musk ox and reindeer could graze on it throughout the entire year.

Kitchen machinery is multiplying so rapidly that the wife of the future may have to be a mechanic instead of a housekeeper.

## CUT THIS OUT

OLD ENGLISH RECIPE FOR CATARRH, CATARRHAL DEAFNESS AND HEAD NOISES

If you know of some one who is troubled with Catarrhal Deafness, head noises or ordinary catarrh cut out this formula and hand it to them and you may have been the means of saving some poor sufferer perhaps from total deafness. In England scientists for a long time past have recognized that catarrh is a constitutional disease and necessarily requires constitutional treatment.

Sprays, inhalers and nose douches are liable to irritate the delicate air passages and force the disease into the middle ear which frequently means total deafness, or else the disease may be driven down the air passages towards the lungs which is equally as dangerous. The following formula which is used extensively in the damp English climate is a constitutional treatment and should prove especially efficacious to sufferers here who live under more favorable climate conditions.

Secure from your druggist 1 ounce of Parmitin (Double strength). Take this home and add to it 1-4 pint of hot water and a little granulated sugar; stir until dissolved. Take one tablespoonful four times a day. This will often bring quick relief from distressing head noises. Choked nostrils should open, breathing become easy and hearing improve as the inflammation in the eustachian tubes is reduced. Parmitin used in this way acts directly upon the blood stream and has a tonic action that helps to obtain the desired results. The preparation is easy to make, costs little and is pleasant to take. Every person who has catarrh or head noises or is hard of hearing should give this treatment a trial.
