don, by the clubs and tomahawks of infuriated barbarians was, as far as ascertained, the culminating act of this violent persecution, and has been detailed with such particularity in these rejoice to think, is of rare occurrence, but when it does take place, it certainly demands the commiseration of the Church catholic. He who thus falls, is the messenger and martyr of Christianity, rather than of any of its sections, and he is pre-eminently "the glory of Christ," whose example he follows, and for whose body's sake he suffers even unto death. We therefore most heartily sympathize with the relatives of the deceased, and mingle our sorrow with that of the denomination to which they belonged.

But we congratulate them, also. They have been singularly honored. Our Province boasts of its Parker and Weisford, its Williams and Inglis, and it has reason at least to be thankful for such representatives of its heroism, its patience, and its fidelity. But more truly great, more divinely illustrious are the names of those who have fallen in the van of Christianity. KARS and LUCKNOW, ever to be remembered, are not to be put in comparison with TANNA and ERROMANGA. The former are land-marks of patriotism, and are of vast importance to the cause of freedom; the latter are monuments of its Divine excellence, and directly tending to subvert that Satanic rule which had inflicted the blow, and is murderous "from the beginning." Under the all-wise Providence of God, no event is so gloomy as to afford no ground of hope-so bad that it may not be productive of good. The persecutions which befall the servants of the Redeemer, oftentimes turn out rather to the furtherance of the gospel. The modern missionary enterprise as clearly illustrates this principle as the history of the primitive Church. In comparing the products of human ingenu ty and power, which the present age has furnished, with those of the past, we should not be justified in saying that the former times are better than these. It is true that we have nothing of which to boast similar to the Pyramids of Egypt, the Palaces of Assyria, or the Temples of Greece, but we have many works equivalent in magnitude, and of immensely more importance than We do not undertake to return rejected articles.
