

than two (2) inches to any electric light or power wire unless separated therefrom by some continuous and firmly fixed non-conductor making a permanent separation. This non-conductor shall be in addition to any regular insulation on the wire. Porcelain tubing or approved flexible tubing may be used for encasing wires to comply with this rule.

Receiving Equipment Ground Wire

(f) The ground conductor may be bare or insulated and shall be of copper, approved copper-clad steel or other approved metal which will not corrode excessively under existing conditions and in no case shall the ground wire be less than No. 14 B. & S. gage except that approved copper-clad steel not less than No. 17 B. & S. gage may be used.

The ground wire may be run inside or outside of building. When receiving equipment ground wire is run in full compliance with rules for Protective Ground Wire, in Section (d), it may be used as the ground conductor for the protective device.

FOR TRANSMITTING STATIONS

Antenna

(g) Antennas outside of buildings shall not cross over or under electric light or power wires of any circuit of more than six hundred (600) volts or railway trolley, or feeder wires nor shall it be so located that a failure of either antenna or of the above mentioned electric light or power wires can result in a contact between the antenna and such electric light or power wires.

Antennas shall be constructed and installed in a strong and durable manner and shall be so located as to prevent accidental contact with light and power wires by sagging or swinging.

(For further revisions see September issue.)

Radio in the Forest

Have you ever considered the advantages of a Radio Receiving Set installed in a Lumber Camp or a Fishing Camp?

Imagine two camps far apart communicating with each other with no other trouble than speaking through a mouth-piece.

How often have you wished you could get all the latest news and developments of the outside world without waiting for days? Just think of listening to a good concert after supper, lying in your bunk smoking your pipe.

All this is being done and has been done by us. We cater specially to Commercial Radio Installations, and will cheerfully furnish plans and quotations to interested parties without obligation.
