scrubbing or impurities. 8B

HUMBERT AFFAIR AGAIN.

Serious Allegations are to be Investigated.

Paris, Nov. 14.-After an animated two miles up the hills to Clifton House. He was escorted by a bodyguard of medical students and a mile-long procession. The streets were lavishly decorated with flags through the generosity of a Bristol millionaire. At the hall the galleries and the balcony were filled by 500 ladies in evening dress, while everyone waved a Union Jack. The Premier reiterated his views on retaliation and fiscal reform. The country, he said, had arrived at the opinion that a certain change was needed in their fiscal system to enable them to deal with the situation. "Our opponents." he said, "have spent a great deal of time in abusing Mr. Chamberlain, to whom they have attributed a sinister motive, far-reaching scheming and debate, the Chamber of Deputies adopted a resolution of M. Berry adopted a resolution of M. Berry (Conservative) creating a committee to investigate alleged political complicity in connection with the Humbert affair. M. Berry asserted that corruption existed in high and low circles, the Magistracy being specially affected. The President of the Chamber, M. Bourgeois, severely rebuked M. Berry's statement. M. Valle, Minister of Justice, opposed the proposed investigation, but the resolution was adopted by 360 to 203. by 360 to 203.

TRAGEDY OF ANIMAL LIFE. Semething Pathetic In the Career of the Passenger Pigeon.

Chamberlain, to whom they have attributed a sinister motive, far-reaching scheming and avowed ambitions, and they have failed to see that this man, who occupied such a great space in the eyes of his countrymen, gave up all for what he believed to be good for Britain and the empire." It had been said that they would offend the great powers if they adopted a change, but did the nation exist on sufferance? Tariffs, like the navy, might be misused and used provocatively, but because that was so were they to be debarred from trying to use them wisely? To him who knows the story of the assenger pigeon this group of beautiful, grayish brown birds with the iridescent golden sheen upon their throats is the last word of a tragedy of animal life. America was once the land of the wild pigeon. Early American writers y? t seemed to him little short of lunacy of they did not prepare to meet the oreshadowed dangers. Sir Michael Hicks-Beach, who was are full of references to it. Alexander Wilson, the father of American ornithology, estimated that a flock seen by

Sir Michael Hicks-Beach, who was received with tremendous enthusiasm, said:—"Free trader as I am, and free trader as I have been, I am prepared to support the policy Premier Balfour has laid down at Sheffield, and also in his speech to-night. That position I understand to be that foreign countries through their protective tariffs have seriously injured our home industries, and both our export and home trade. The matter has been made more serious by those unholy modern institutions, trusts and combinations. He thought the Government should be armed with weapons by which they could say to protectionist countries: 'Unless you treat us in a fair way we will penalize you in a way which will be disagreeable to yourselves.'" The will penalize you in a way which will be disagreeable to yourselves." The Prime Minister knew that on this or on any other subject, if he cared to seek his opinion, that opinion was always at his command.

Sir Henry Fowler, who also attended the ceremonies, was escorted to the ployed. Thirty dozen birds were captured at one spring of the net. One man netted 500 dozen in one day. In the nesting season trees were shaken or felled and wagon loads of squab taken nightly, droves of hogs being turned in to utilize what the "hunters" had left. Wherever the distracted flocks appeared the slaughter began. At the last known large pigeon "nesting," in 1878, a billion birds were killed during the season. Like the bleen it during the season. Like the bison, it was effectually exterminated, showing the terrible efficiency of man when he sets out systematically in pursuit of

Zionish Hope, However, Is That Some Day Palestine May Be Restored to the Jews-Action of British Government in Proferring Tract of Land in Uganda for Jewish Settlement Has Given Re-

The Zionist Congress recently held in Basel, Switzerland, will long be remembered as notable because of England's offer of a large tract of land in East Africa as a refuge to the Jews, a new land of promise. The proposal of the British Government to the Zionist Congress is to establish an autonomic Jewish set. ment to the Zionist Congress is to establish an autonomic Jewish set tlement in that part of the British East African protectorate which lies on the high plateau of the Victoria Nyanza, between the Narobi and the Man escarpment, and thus to direct the exodus of the Jews from Europe to the Source of the Nile, at whose

MASI WARRIOR OF THE "PROMISED LAND" delta Israel dwelt more than 3,000 years ago.
The Zionist

The Zionist society is composed very largely of Russian and Polish Jews, with a sprinkling of English, German and other members of the faith, and their desire and hope is that some day Palestine shall be re

stored to the Jews.

The action of the British Government in proffering the tract of land in Uganda for Jewish settlement has in Uganda for Jewish settlement has given a renewed impulse to the Zionist movement, which had been checked by the failure of Dr. Theodore Herzl to come to an agreement with the Sultan of Turkey for the Jewish occupation of Palestine, the Sultan's terms being incompatible with the program of the Zionists. The proposal of England was received with favor by a majority of the delegator. favor by a majority of the delegates to the Zionist Congress, and alsome raised the cry that East Africa was not Zion the Con gress, decided to send a sion to Uganda to investigate con-

ditions.

No matter how alluring the offer No matter now alturing the oner of an autonomous state among the rolling downs of Uganda may be, it cannot and will not replace the prom-ised laftd in the estimation of the Jewish masses. The attitude of the overwhelming majority of the Russian delegates made that clear.
The first word of rebellion against Dr. Herzl was heard—he was the la-

loved leader because he was leading to Zion, not to East Africa. The protest came strongest from those who can least afford to wait for the

who can least afford to wait for the realization of the Zionist ideal-from the Kishineff delegates.

When the roll call proved an overwhelming majority of the Congress in favor of the British proposal, over 160 delegates rose in wildest excitement, left the hall and repaired to a smaller hall, where they pledged their lives to Zion.

The territory offered to the Laws is

The territory offered to the Jews is a great plateau nearly 4,000 feet above sea level and is fertile, well watered, abundantly timbered and is blessed with a salubrious climate. It blessed with a salubrious climate. It is in this part of Africa that the river Nile rises, and the region is said to be one of the lew sections of Africa where white men may thrive. Dr. Herzl of Vienna, who has devoted

nd money to furvoted much time and money to furthering the Zionist movement, is pleased with the offer of Great Britain and has expressed the belief that eventually the Jews of Russia and Poland will occupy the territory as

an autonomous nation.

After the failure of his negotiations with the Turk Dr. Herzl proposed to the Egyptian Government that the Sinai peninsula, adjoining Palestine, be opened to the Jews for the purpose of founding a new land

A BAILWAY TRESTLE IN THE "PROMISED LAND." of Zion. Egypt regarded the proposof Zion. Expression and the proposition favorably, and a commission of Zionists investigated the matter. The lack of water in this territory, however, necessitated the abandonment of the project.

ment of the project.

Then came the profier from Great:
Britain of the East African region.
The country which has been tendered as a gift to the Zionists was opened up and made accessible by the completion of the Uganda railway last year. This railway was constructed at a cost of over \$30,000,000 and has been an immense value to the region. It is said that England's offer to give the land to the Zionists has not met with the approval of the few British people who

BRITISH EAST AFRICA, WHERE A NEW
JEWISH NATION MAY ARISE.

Except on the coast and on the shore of Lake Victoria Nyanza the climate is admirable, and the whole

climate is admirable, and the whole country is fertile. From Makindu, 200 miles inland, and for about 400 miles further the country is describ-ed as beautiful. The fertility of the soil is marvellous, and settlers from Australia and South Africa say that

Australia and South Africa say that the Uganda country is the finest they have ever seen. It offers splendid opportunities, say these men, to the farmer and the cattle raiser.

During the visit of former Colonial Secretary Chamberlain to Uganda last December he expressed the opinion that as a grain and cotton growing country British East Africa would stand unrivaled. The harbor at Port Reitz, which is in direct touch with the Uganda railway, is large enough to accommodate the enlarge enough to accommodate the en-tire British Fleet and is said, to be

one of the finest in the world.

The tender of this country to the Jaws was the sensation of the Zionist Congress. The prevailing sentiment was that it would be impolitic to reject so generous an offer by a mighty Government. It was argued that it was not a deviation from the that it was not a deviation from the Zionist program to settle a million Jews in East Africa during the next quarter of a century (if the offer should finally result in such a settlement) and would in no way interfere with the striving of the people for their historic home in Palestine. In the meantime the pressure on the Congress resulting from the present cry of the homeless would be relieved and a million Jews would have a lesson in self government.

One of the foremost leaders of the Zionist movement is Dr. Theodore that it was not a deviation from the

Zionist movement is Dr. Theodore Herzl of Vienna, litterateur and dramatist, and he is ably seconded by Dr. Max Nordau of Paris. Dr. Nordau says his people are intellect-ually and morally superior to all Aryan races. Israel Zangwill, auth-or and dramatist, of London is another noted Zionist. These three mer are representative of the movement in Germany, France and England. Many thoughful Hebrews, however, oppose the movement, fearing that if the new Zion ever becomes a real-ty the powers may ultimately combine to force the Jews of Europe to seek a refuge there.

In Canada the movement has some strength, Not that the Jews of this country have any wish to emigrate to Palestine or any other country, should a new Zion be established, but those who favor the movement do so from a desire to provide a haven for their co-religionists who are oppressed in other lands, Dr. Herzl's plan, as first outlined in the Congress held at Basel in 1897 and In Canada the movement has som Congress held at Basel in 1897 and which will probably be adopted if the British offer of land in East Africa is accepted, is to draw the Jews from the sections of Europe where they are oppressed and where the struggle for life is made almost

HOSPITAL IN UGAND hopeless because of the severity with

which they are treated.

At the recent Zionist Congress Dr. Herzl announced that he had assurances from the Russian Government

ances from the Russian Government that if the Zionist movement kept on its present orderly way in that Empire the Czar would aid in negotiations with the Sultan of Turkey looking toward the occupation of Palestine by the Jews.

In the meantime it is not improbable that the new Zion may grow up in the Uganda country. It is estimated that if the offer of England be accepted in less than twenty-five years a flourishing nation will have arisen in the region from which the Nile makes its way.

So it is not improbable that the children of Israel will make another journey in the wilderness and found a new nation. But unlike their entrance to the land of Canaan, they will not be forced to make weary marches on foot. English railway marches have negriners have recorded to engineers have proceeded them to British East Africa, and if they enter that country they will do so in modern railway carriages, crossing ravines and rivers that have been bridged by the skilled workmen of the world.

The stars.

There are about 200,000 stars between the first and ninth magnitude, the number at each lesser magnitude being about three times that of the next higher. Now, if this rate of increase were continued down to the seventeenth magnitude there would be about 1,400,000,000 visible. In the b?st modern talescopes, telescopic observation and photographic charts show nothing approaching this number. The latest estimate does not exceed 100,000,000. As the instruments reach farther and farther into space they find a continuous diminution in the number of stars, thus indicating an approach to the outer limits of the stellar universe:

The Home of Musical Fish.

Lake Batticaloa, Ceylon, has the probably unique distinction of being the home of musical fish. The sounds emitted by these are said to be as sweet and melodious as those which would be produced by a series of Aeolian harps. Crossing the lake in a boat one can plainly distinguish the pleasant sounds. If an oar is dipped in the water the melody becomes louder and more distinct,
