

# Puts every Kernel where it will Grow.

In sowing seed, as in human affairs, "there's many a slip between the cup and the lip," but there is nothing of the "hit and miss" in a field sown with a

Wherever a Horse or Engine can travel, the

## VAN BRUNT NEW MODEL

is guaranteed to perform faultless work. The first success in history in a Single Disc with closed delivery was made by Van Brunt in 1900. The "New Model" is as great a step in advance of that great original as the latter was ahead of anything else of its time and is still the model from which all copies have been made.

THE "VAN BRUNT NEW MODEL" IS STRONGER AND LIGHTER BY 300 TO 400 POUNDS THAN ITS IMITATORS.

## Van Brunt LIGHT DRAFT DISC DRILL

With the NEW MODEL BOOT DISCHARGE (by which the act of seeding is done with the boot and discharged WITHIN instead of outside the circle of the disc) not a single kernel can fail to be planted at the exact and proper depth for germination. There is not a seed left on top of the soil, or so near the surface that wind or shower can expose it.

Made in 12, 14, 16, 18, 22 and 24 Single, Double, Disc and Shoe interchangeable.

# Light Draft John Deere Gang Plow

## HOW TO SELECT A PLOW. THE RULE OF FOUR.

Plow quality does not improve with age.

An inferior plow does poorer work, is harder to pull, and costs more for repairs every year it is in use.

Because certain things about a plow cannot be changed for the better after you buy it, care and study before buying, is important.

Judging the real worth of a plow is not difficult if four things are kept in mind.

**First**—Quality of work.  
**Second**—Ease of management.

**Third**—Lightness of draft.  
**Fourth**—Strength and durability.

## WHY THESE FOUR QUALITIES ARE THE TEST.

**First**—Nothing takes the place of good work. Unless a plow does perfect work you cannot afford to own it, no matter what the price.

**Second**—Have regard for your own comfort—that pays. Get a plow that is easy to ride, and that can be operated with little effort on your part.

**Third**—Never work horses harder than necessary. Horseflesh and horsefeed cost money. An extra one-eighth horse-power added to the draft will cost you the price of a plow—very soon.

**Fourth**—Repairs are expensive—a good plow lasts longer than a poor one.

## The Light Draft New Deere—Why it Pulls Easy

Consider five things when judging the draft of a plow. **First**—the shape of the bottom. **Second**—Material out of which it is made. **Third**—Equal weight on all the wheels. **Fourth**—Proper adjustments. **Fifth**—Staunchness of the plow.
