Stop Wasting Cream!

The farmer who gets only a part of the cream from his milk is not only wasting cream-he is wasting time, energy and money.

THE SUPERIOR SEPARATOR

will take ALL the cream out of the milk and requires far less energy. The extra cream pays the cost of the new separator. A "Superior" Separator of 500 lb. capacity costs only \$52.50—the 600 lb. capacity machines cost only \$65.00. Liberal allowances for old separators in trade.

Investigate the "Superior"-learn about the ball-and-socket spindle, and the self-balancing bowl, the "fresh" oiling system, and the crank clutch-ALL making for the easiest turning and the closest skimming.

The free book of "Superior" facts tells the whole interesting story.

Don't Blame the Farmer

HERE is a prevailing idea among city dwellers that farmers are getting rich, and, worse still, getting rich at their, the city folks, expense. Almost every one of us have heard city housewives grumble about the price of butter and eggs. The prices of meat come in for special condemnation.

We cannot blame these women. They have a hard enough time to make ends meet and supply themselves with the huxuries that city people class as necessities. A comparison of wholesale and retail prices, however, will show that we farmers are not zetting more these now. are not getting more than our fair share of the consumer's dollar.

Last week, for instance, choice steak was sold at twenty-five cents a steak was sold at twenty-five cents a pound. The cheapest cuts could not be gotten below twelve cents. On the same day the farmer was receivisme \$7 to \$9 for his cattle. It city p would consider the wide diver between wholesale and retail ps. they might turn their attention eige-where to locate the reason for the high was considered. We will not here where to locate the reason to the accept of food stuffs. We will not here attempt to fix the blame. Of this we may be sure, however, farmers can carry a clear conscience in the matter.—F. E. E.
