A **BT** LITTER CARRIER OR FEED CARRIER

properly installed, is a machine that will last. The track is the heaviest used by any firm for this purpose. The carrier is simple in construction, and running on a strong level track there is nothing about it to get out of order.

Although worked every day of the year, it will outlive any other machine on the farm.

A litter carrier will save you a lot of heavy work. One load will take the manure from 15 to 20 cows, and no matter how deep the snow or mud may be it is easy to put the manure anywhere in the yard, or dump it directly into a wagon. The stable and yard can be kept cleaner, and much time saved.

Write for catalogue and prices, and learn why a BT Carrier is Best.

**WHY THE BISSELL STEEL LAND ROLLER IS BEST**

Because the "Bissell" is built for business it lasts for years and gives satisfactory service all the time. It is made strong and durable to stand any strain. Steel drums with solid pressed steel heads well riveted; axle of 2-in. solid steel, frame of hardwood reinforced with double truss rods and steel angles make it rigid and stout. Bearings are large anti-friction rollers which reduce friction to the minimum making the "Bissell" the lightest draft roller ever built. Nothing flimsy or shoddy about it. Free Booklet E tells why you should buy the "Bissell." Write today.
