BATHS. ELECTROPATHIC INSTITUTE, 24 Queen's Avenue, London, Ont.

MOLIERE ELECTRIC VAPOR BATHS. The first physiological effect of the Molier Electric Vapor Bath is to perfect the perspiration functions of the skin, to give a living and healthy cuticle, instead of the weak, diseased covering which the majority of people possess. The skin is thus fitted for inhaling the oxygen of the atmosphere, and for the most important processes. To a person liable to take cold from exposure to slight drafts, the Electric Vapor Bath is one of the most striking results. In no diseases are the effects more magical than in Rheumatism and Gout. In northern climates the functions of the skin are to a great extent dormant, and its purpose as an outlet for refuse matters of the system is nullified by inaction. The use of these Baths remedies this state of things, giving at the same time, beauty to the skin and health to the body. Its utility in chronic congestion of the liver and spleen, and in most affections associated with chronic indigestion, cold, inveterate depression of spirits, catarrhs, diseases, affections of the kidneys and dropsy, (where dependent, is without doubt, it is common to associate perspiration with debility, and to imagine it to be weakening to the system. This is a mistake, passive means cannot weaken. Travellers in the East resort to bathing establishments for refreshment and invigoration. Electric Vapor Baths are highly tonic, and are found to put weak people in often, as it is gradually drawn away in living issues, but merely effects neither which enervates instead of invigorates.
