sociation of Vancouver, waited on the li-Rock Creek, B. C., June 25.-[Special.]cense commissioners recently, and appeal ed to the members of the board for a bet-Work will be commenced immediately on the repair and reconstruction of the government wagon road up the main Kettle river as far as Beaverton. A bridge will be constructed across the west fork, for which the sum of \$600 has been set aside The appropriation altogether is only \$9000, and as it is to be expended in day labor is not considered here sufficient to build a good trail let alone a wagon road. Owing to the fact that the surveyors have found a pass up the north fork 500 feet lower than any previous surveyed the railway will be built that way, and lots in Rock Creek townsite have gone up. The railway will make quite a stir around the Kettle river valley, as there are many valuable prospects which would certainly ecome mines with development, but ow ing to the difficulty of having everything brought in by wagon and pack horse tney have not got beyond the prospective stage. On the Commonwealth claim, situated our miles north of Rock creek, in what is known locally as the Commonwealth camp, work has been commenced on a 100foot contract by George Lemon and R. S. Lyon of Rossland. The Commonwealth is one of a group of four claims, which is owned by Hugh Reed (late of the Saulte) and several eastern parties. It lies on the side of a steep ridge overlooking the Ket tle river and has an admirable tunnel site. The surface showing on the claim is an immense ledge of iron capping, which street, Vancouver. They were in the trench, which is 22 feet deep at the point Star of Rossland. It has been exposed for in question, and were overcome by gases from a blast which had recently been let off. It was some time before they could with a 30-foot crosscut at the bottom, which shows up almost solid ore with no wall in sight. The average value received

from that depth was \$14 which is very good considering the depth obtained and the size of the ledge. All that is necessary to make this property a mine is depth and development. The Kettle river has been in flood for
