AT THE LE ROI.

Mention has already been made in the Miner of the fact of the commence ment of operations in the main shaft and the drifts on the 1050-foot level. Roth these contracts are now in full swing, and a period of probably three months will be occupied in their execution. Other contracts are being carried out in various parts of the mine, and period in question. the usual stoping and development op-

The output of the mine during Feb ruary was 19,000 tons. The additional men employed on the property in connection with the new contract brings the Le Roi's list of employees up to 560, a full complement

It is interesting to note in connection with the Le Roi that the Northport smelter is establishing something of a record in the matter of the treatment of ore. It is by no means unusual for the plant to treat 1000 tons of ore in a day, but up to the present time the works have not made it an object to handle this quantity of material day in and day out. Early in the month everything was got into shape to put the plant on a thousand-ton per day basis, but it became necessary to close down one of the furnaces for eighteen days pending repairs to the water-jacket. This has been attended to and the onto able importance and general interest.

WHO COLLECTED BY A NEW PROCESS.

BRICK AND ARE NOW UNDER

ARREST.

(Special to the Miner.)

NELSON, B. C., March 3.-Simor Pleff and H. J. Labrash, of Ymir, are in the provincial jail in Nelson awaiting trial tomorrow morning before Stipendary Magistrate Crease on a rather unique charge,

It appears that on Sunday last P. J. Nicholls, lessee of the Fern mine, was superintending the monthly clean-up of the mine. With him were working in the laboratory the two prisoners. As a result of the clean-up there was a brick of gold valued at \$700. This brick Pleff and Labrash are said to have kept possession of, informing the manager that their wages were considerably in arrears and that they would cut off enough from the brick to satisfy their claims. This the prisoners state they did, returning the balance to Mr. Nicholls, together with a receipt for the amount received. The on February 25, shows that there is owing to the Bank of Torport, presented at the meeting latter from information received learnmediately left for this city on foot, and on arrival had a warrant issued

for their arrest. The two men came into Nelson on Sunday and proceeded to the Kootenay hotel, where they were shortly afterwards arrested by the police, two portions of a gold brick having been placed in possession of the hotel keeper by them on arrival. They were brought up for trial before Magistrate Crease today, but as the prisoners de-

Daniel Senior to Seattle, I. N. Bell to at the same time Parsons was con- and had not yet reached a determina-Seattle and T. A. Pippy to Portland, versing with the crew.

## STAR TO SHIP

The Centre Star mine will

commence shipments in a few days to the Trail smelter. The mine has about 1000 tons of ore ready to load on the cars at once. The fact is of special interest in Trail as well as in Rossland, for the reason that the Canadian Smelting Works will thus be enabled to blow in its copper furnaces, which have been dark for a couple of months, because of the repairs under way to the plant, including the installation of the new sampler, and second on account of the lack of gold-copper ores, which will now be filled by the shipments from the Centre Star.

### SEATTLE'S ELECTION

MAYOR HUMES HAS APPARENTLY AGAIN CARRIED THE

# **IRON MASK**

The Mine May be Sold to Montreal and New York Men.

A Possibility of Its Being Worked on a Larger Scale.

Montreal and New York capitalists have taken an option on the Iron Mask mine. This report is made on excellent authority, together with the statement that the deal for the purchaseof the property is being handled by M. S. Logan, mining promoter of this. city, who has been in the east for several months. Mr. Logan has a strong clientele in the cities mentioned, and has already influenced the investment of capital in the mining resour-

ces of the Kootenays. The examination of the property made recently by J. L. Parker, M. E., was for the information of the pros-pective purchasers, and the fact that the deal was on explains the policy of the mine management in keeping the property pumped out instead of permitting the workings to fill, as would have been the natural course after the shutdown was decided upon. The cost of pumping the mine represents a considerable outlay, which would have been saved had the company not desired to have the mine in such shape that it could be examined without difficulty by the representa-SEATTLE, March 4.-At 11 o'clock tives of parties who might enter into pany's head office at Spokane

A peculiarity of the election is that the ward where the "Four Hundrer" live is going for Humes, despite his wide open policy
