

Brantford citizens have this sum- a height of 200 or 500 feet, windage! mer witnessed real structural iron must be taken into consideration and the framework must be so arranged that it will be well braced to with-Of all trades that of the structural stand an enormous pressure. Then, iron worker is the most hazardous, too, the foundations must be considespecially in the erection of tall build- ered and it is not unusual for some of

for, if the building is to be erected to. The most important adjunct to the when they wish to make a trip to the to be at great heights.

ings generally known as sky-scrapers. the exceptionally tall buildings to founded upon statistics, that in the the street floor.

he entire framework on paper. the skyscraper arises from the street them.

This in itself is a task of magnitude level and pierces the air. It is

Fixing a Beam in Position

strument is carried up with them, derrick lower them. Again they will we would with a building one-third as top. Then the derrick will hand them see 100 feet or more of pure framethe street floor.

In making the detail plans for the floor by floor, and by it all of the mast income life is lost upon each of them.

This, however, does not necessarily revers that in the street floor.

This, however, does not necessarily revers upright, beam, strut, etc., is present the street floor.

That's the street floor.

In making the detail plans for the floor by floor, and by it all of the mast income was laid.

That's the secret. Getting used to it.

The secret is promited up with them, derrick lower them. Again they will hand them see 100 feet or more of pure floor.

In making the detail plans for the iron work great care is exercised, and certain is handled. One of the most into post the floor by floor, and by it all of the mairon work great care is exercised, and certain is handled. One of the most into post the floor by floor, and by it all of the mairon work great care is exercised, and certain is handled. One of the most into post the floor by floor, and by it all of the mairon work great care is exercised, and certain is handled. One of the most into post the floor by floor, and by it all of the mairon work great care is exercised, and certain is handled. One of the most into post the floor by floor, and by it all of the mairon work great care is exercised, and certain is handled. One of the most into post the floor by floor, and by it all of the mairon work great care is exercised, and certain is handled. One of the most into post the floor by floor, and by it all of the mairon work great care is exercised, and certain is handled. One of the mos mean that the mortality should be among the iron workers, although those who erect the frames of these gigantic structures seemingly have the most dangerous work.

Take a trip yourself to even the mort latter defrick man, the man who holds ing.

It is at such exhibitions that the lives of his fellows in his hands. It is at such exhibitions that the lives of his fellows in his hands.
