

Some of the Strong Features Brought Out at the Recent Investigation of

## The Mutual Life of Canada

This Company has been Examined by the Royal Commission

and the investigation proved thoroughly honest management. The company is sound to the core, and its affairs are conducted along scientific and popular lines, solely and economically in the best interests of its policyholders.

Gilt-edged Assets, Dec. 31st, 1905—\$9,296,092

Not a dollar of stocks.  
Not a dollar of unauthorized securities.  
Not a dollar of speculative investments.  
Not a dollar with subsidiary Companies.  
Not a dollar "written up" in its list of securities.  
Not a dollar for stockholders; every dollar for policyholders.  
The Company is in the enviable position that it can convert on demand its entire assets into gold, and at the same time largely increase its surplus.

### The Real Estate

held by the Company (outside of Head Office Building) IS LESS than \$1,000.

### Expense Rate Unusually Low

being the LOWEST OF ALL Canadian Companies for the year 1905, notwithstanding that the LARGEST VOLUME OF NEW BUSINESS in the history of the Company was written in that year.

### Remarkably Favorable Mortality Experience

The losses by death in 1905 were only 49% of the losses that were normally expected to occur. The fine quality of this Company's business is shown by the notable fact that during the past 15 years the death losses AVERAGED ONLY 53% OF THE EXPECTED.

### The Rapid Growth of the Company's Income

The income for 1895 was \$735,079, while in 1905—ten years after—it reached the large sum of \$1,956,519. The interest income exceeded the death losses during the same period by \$568,945.

## The Mutual Life of Canada

(Head Office, Waterloo, Ont.) is an Ideal Company, Furnishing Absolutely Perfect Protection to its Policyholders at the Lowest Possible Cost.

Geo. H. Redpath, General Agent, Chatham

## SUNSHINE FURNACE

### How is Your Furnace Constructed?

You want a furnace that is constructed on scientific lines—one that will extract every atom of heat from the fuel and send it through the house, not up the chimney.

The SUNSHINE is the result of more than 56 years in successful furnace building—it is in use from Halifax to Vancouver, and is giving satisfaction everywhere.

Will burn any kind of fuel, is easy to run, solidly built, wastes no heat, and is everything that a good clean, modern furnace ought to be.

First Baptist—11 and 7.30.  
Union A. M. E.—11 and 7.30.

### NOTICE TO PASTORS.

Pastors and others who contribute news items to this department of Saturday's Planet will confer a favor by seeing to it that their "copy" reaches this office not later than Friday at 4 p. m. Matter received later than that hour cannot be guaranteed insertion.

### INTERNATIONAL BIBLE LESSON FOR TO-MORROW.

Jesus Teaching How to Pray—Luke 11, 1-13.

Golden Text—"Lord, Teach us to Pray."

Wireless telegraphy outdone—shares in this old and reliable system given freely to whoever will, by the great Creator and Inventor Himself, direct, complete and in perfect order, through Jesus Christ our Lord, between heaven and earth and man.

Verses 1-2—The disciples hear their wonderful Master in prayer, and want to learn.  
Verse 2—He teaches them to address God direct as a Heavenly Father, honoring that holy name. God's kingdom comes first, which means His will be done on earth, as in heaven. A soldier's first duty is obedience, as soldiers of the King of Kings if we have not the spirit of prompt obedience to the spirit and word of God we will hinder and not promote the coming kingdom.

Verses 3-4—Think of a son, soldier or laborer asking for daily bread, who won't obey daily orders.

Verses 5-6—We can't hold grudge against a comrade if our Father forgives us. A praying soul is never foodless, but it knows its entire dependence on divine guidance and grace, and is delivered from evil.

Verses 7-8—Verses 9-13 illustrate God's love and care by the way an earthly parent would act to his hungry child. Prayer implies need and supply, and if our prayers go to God on the lines here laid down by His Son, our continued providential requirements for the King's service will prompt and inspire us all the time, and prayers will come to have an increasing richness, power and joy for us, and our spiritual life will be an unending, eternal spring.

Let us use this blessed, wireless, God-given privilege and draw as we need on Him and His wonderful love. Let us pray.

### CHURCH NOTES.

#### First Presbyterian.

Rev. A. H. MacGillivray, pastor. Short services will be the order during the hot weather.

Rev. Mr. Nettress, of Amherstburg, will occupy the pulpit on both occasions to-morrow.

Regular weekly prayer service on Wednesday evening at 8.

Christian fellowship meeting to-

MRS. LOUIS LACOMBE.  
SUFFERED FOR MONTHS.

Operation Advocated—Saved By Pe-ru-na.

Mrs. Louis Lacombe, Hayward, Wis., writes:  
"I have followed your treatment as closely as I could and am now entirely well."

"We had two doctors and one said that I would have to have an operation performed before I could regain my health."

"We then decided to write you as to my condition, as I had been suffering nearly a year with severe pains and headaches at times so that I could scarcely stand up."

"Now I feel so well after a short treatment with your remedy, and am so grateful that I do not know how to express my thanks."

"I thank you many times for the kind advice I have had from you."  
Write to Dr. S. B. Hartman, President of the Hartman Sanitarium, Columbus, Ohio, for free medical advice.

tomorrow morning at 10 o'clock, in S. S. Hall.

Young Men's Club every Tuesday evening at 8, in S. S. Hall.

A. U. M. P.

Services will be held as usual to-morrow.

Regular weekly prayer meeting on Wednesday evening at 8.

Mt. Zion Baptist Church.

Rev. W. T. Nickerson, Pastor elect.

Service at 11 a. m. and 8 p. m.

Sunday School at 12.30.

### KEEP THE LIVER CLEAN.

Don't Overwork It and Give It a Rest Once in a While.

A man of common sense and a doctor at that said: "The liver is misunderstood and underestimated in its functions. If it can be kept clean and active there is no reason why we should ever be ill a day, and we should live to be 150 or 200 years old. It is not necessary to rip this organ all to pieces with ten grains of calomel to get it stirred up. The best thing to do is to shut off your food supply for two or three days, drop your whisky and claret, your tea and coffee, and give your liver a chance to rest. This should be done once a month."

It is well known, of course, that in olden times the liver was supposed to be the seat of the affections. Friends when they met in the morning did not salute each other with "How's your health?" but with "How's your liver?" Men take horseback exercise principally for their livers. A good shaking up every morning drives away the cirrhotic encroachment. It is an error to assume that whisky alone produces cirrhosis. Overfeeding is more often the cause. If the digestive organs would organize a union and work only eight hours a day all of us would be healthy and long lived. The trouble is we require the liver, stomach, bowels, heart, brain, muscles, nerves, kidneys, spleen, etc., to work all the time and overtime. Wrong. Give them a rest.

### MINING FOR RUBIES.

The Primitive Methods That Are Still In Use in Burma.

The system practiced for obtaining rubies in the mining districts in Burma is of the most primitive description, says the Searchlight. The mining shafts are simply holes about two feet square sunk to a depth varying up to fifty or sixty feet. The shoring up of the walls of the shaft is most crude, the sides being supported by posts at the corners and branches of small trees secured carefully against the sides by means of stout sticks.

The miner carries a tin pot similar in shape to a blunt edged cone on his head. He squats down in one corner and digs between his knees in the opposite corner. The earth, or byon, as the ruby bearing earth is called, is conveyed to the top as fast as it is excavated in small buckets let down from above.

The apparatus for raising and lowering the buckets is simple in the extreme. A stout bamboo post about twenty feet high, called a maungdun, is fixed upright in the ground at a convenient distance from the pit, or dwin, and a long, thinner bamboo pivoted horizontally into the upper end of it so as to project an eighth from the mine and the long arm toward the mine.

Telling Age and Sex by Pulse.

"The female pulse always beats faster than the male," said a physician, "and from birth to death the pulse speed steadily decreases. I have no doubt that by the pulse alone I could tell readily a healthy person's age and sex. Babies at birth have a pulse that beats 160 times a minute in the case of girls and 150 times a minute in the case of boys. At the age of four or five the pulse beats will have fallen respectively to 110 and 100. Maidens' and youths' pulses average ninety-five and ninety; mature women's and men's average eighty and seventy-five; elderly women's and men's average sixty and fifty. An old woman's pulse rarely if ever sinks below fifty, but among old men a pulse under fifty is fairly common."

A Cask's Capacity.

Should you wish to get the capacity of a cask you can do so in the following manner: Take the measurements from the bunghole to the bottom of each end of the cask in inches. Average the two measurements. Multiply this figure by itself twice. Then multiply the product by .002268, and the remainder is the number of gallons. Example: 81 inches, 29 inches (average 30 inches). 30x30x30=27,000, which, multiplied by .002268, = 61.182. The contents, therefore, are 61 gallons and a fraction.

Modest Greatness.

One day a letter was received at the postoffice in Paris bearing the following inscription: "To the Greatest French Poet." The letter carrier was instructed to deliver it to Victor Hugo, who refused to receive it and sent it to Lamartine. This genius also declined to accept the letter and passed it on to Alfred De Musset. The latter, equally modest, re-sent it to Victor Hugo, who finally accepted it. The letter had reached its destination—Lippincott's Magazine.

A Wasp's Nest.

One kind of wasp found in Brazil and Guiana makes its nest of a brilliant white pasteboard, suspending it from the highest branches of the trees so as to escape the attention of the monkeys, which in those regions have a troublesome habit of investigating everything, even a hornet's nest.

Shortening the Visit.

"It is a great comfort to have a child about the house," said the man of domestic tastes.  
"Yes," answered the unfeeling wretch, "when company comes that you don't care for you can make the child recite."

Her Possessions.

"I have two lovely little puppies," said Mrs. Tawley.  
"I have met your husband," replied the man. "Who is the other one?"—Judge.

Gain not base gains; base gains are the same as losses.—Hesiod.

The Ensign Remedies contain the elements out of which and by which your body was constructed. They will repair and cure any disease condition.
