Wellington Street West CHATHAM, ONT.

**NEW THOUGHTS.**

Are you growing more attractive as you advance in life?

"Given a healthy body," says Dr. R. V. Pierce, the specialist in women's diseases, of Buffalo, N. Y., "and a healthy mind, and everyone can cultivate and enjoy happiness."

"We must eat properly and digest well to be beautiful. It is a fact that any form of dyspepsia may in a few days transform a clear, white skin into a mass of pimples and black spots. A beautiful woman has the beauty of her stomach."

Dr. Pierce's Golden Medical Discovery maintains a person's nutrition by enabling one to eat, retain, digest and assimilate the proper nutritious food. It overcomes the gastric irritability and symptoms of indigestion, and thus the person is saved from those symptoms of fever, night-sweats, headache, etc., which are so common. A tonic made up largely of alcohol will shrink the corpuscles of the blood and make them weaker for resistance.

"This is to certify that I have used Doctor Pierce's Golden Medical Discovery, which is the greatest medicine in the world," writes Mrs. V. M. Young, of West, W. Va. "I had dyspepsia in its worst form. I decided to try your medicine. I used five bottles, and now I am doing my own housework. A number of my friends also are using Dr. Pierce's medicine and they recommend it highly. May God bless you in your grand work."

Dr. Pierce believes that a tonic made with alcohol will shrink the red blood corpuscles; that is why he avoided the use of any alcohol or narcotics in his "Medical Discovery," which contains the pure extract from roots and herbs without a particle of alcohol.

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for dyspepsia or debility.

Biliousness is cured by the use of Dr. Pierce's Pleasant Pellets.

**PASSING OF THE CHATEAUX**

Palaces of the World Coming More and More Into Public Ownership.

The great royal chateaux, not of Touraine only, but of the world, are all nearing their appointed end of public ownership. Kings build; peoples inherit. The palace in its uses broadens slowly down to the multitude. The smaller houses sometimes fall by purchase to the middle class, but that is only the change in one of its stages. The larger ones soon reach the museum and the pleasure ground, and this even in countries and at times that are not distinctively republican. Louis XIV. built Versailles. Who holds it now? The caretaker for the man in the street. The Louvre is a museum. The Tuilleries has gone to make way for a garden. Kensington palace is now among the sights of London. Windsor castle is not much more, and lately, when there happened to be no music for the visitors to the castle on a public holiday, the royal band, "to prevent disappointment," was hastily recalled from a distant scene. The Tower of London, once a palace, now holds the regalia that serve as a toy for the crowd. Potsdam and Sans Souci are, for all and several, in the same sense. So is the huge Escorial. The Kremlin of the czars is no better, and even The Hermitage, which, strictly speaking, is one of the halls of the Winter palace at St. Petersburg, is a picture gallery to which all could find their way until the nihilists threatened its integrity.

So passes the glory of the world. But that glory, in the chateaux of old, was often so closely allied with shame and misery and corruption that their last state, as playgrounds for the tourist, may still be better than the first—Century.

Some people make mountains out of molehills, and others just put up a bluff.

**ABSOLUTE SECURITY.**

Genuine  
**Carter's Little Liver Pills.**

**COTTAGE BIRD SEED**

Cottage Bird Seed is a mixture of bird seed and cottage cheese, and is sold in a small bottle, with a label showing a bird.

**HEAT AND TANNED SKINS.**

The Miracle That Nature Performs When Sunburn Occurs.

There are certain arctic animals, dark coated in the short summer, that in winter turn pure white, thus matching the snow covered landscape and escaping notice and harm.

This change of color, this protection, effected no one knows how, is wonderful, as wonderful as a miracle, and yet a kindred change of color, a kindred protection, happens among mankind every summer, and nobody ever notices it.

When the pale city people go out in the summer sun at the seashore or the mountains the light attacks them fiercely, first reddening their skin, then swelling, blistering and scorching it. If they kept in the sun enough, and if no miracle occurred, the light would kill them finally, burning off the skin first and afterward attacking the raw flesh.

But a miracle does occur. The skin changes from a pale color to a tan and on this tan the sun has no effect. The sun may beat on tan colored skin for days and weeks, but such skin remains always sound, unblistered, whole.

Thus nature works a miracle. The white skin is suffering, and nature, aware, somehow, that a tan skin is sun proof, changes to tan the white. How does she do this? Where did she learn that it was wise to do this? No one knows. Only the fact of the miracle remains.

To prove this miracle—to prove that it is not the hardening of the skin, but the change in its color which protects it from sunburn—is an easy matter.

Let a pale person, unused to the sun, stain one side of his face yellow, and, leaving the other side untouched, go out in the bright summer sun for a couple of hours. The one side of his face is no tougher, no more hardened than the other, yet the unstained side will be inflamed, blistered, while the tan colored one will be quite cool and unharmed.

Sunburn is a miracle, a protection to mankind as inexplicable and as wonderful as the miracle of the arctic animals' change in the winter from dark coats to snow white ones.

**MAKE YOURSELF KNOWN.**

A Little Story That Shows the Value of Acquaintances.

How professional men make acquaintances can be illustrated by the story of two men whom I know. One of them, a dentist, had a practical father, who taught him how good an investment good clothes and many friends might be. This doctor lived for many years at leading hotels and at evening mingled socially with the guests. There was never a pleasanter man than he at these leisure times, nor a man of better appearance, although during the early years he was constantly in debt to his father, and in all this social life he never mentioned his profession or his work unless such personal talk came naturally into the conversation. Each year he went to Europe and dined at the captain's table, always in immaculate evening clothes. Sometimes he went and returned by the same ship, for there was no time to gain by staying abroad. Everybody liked him, and today he has an immense practice, a considerable proportion of which he admits frankly can be traced to his steamship acquaintance. One day a year ago he met a lawyer of about his own age and degree of success at their club.

"I'm going abroad Saturday," said the lawyer. "Come along," he added, half in jest. The doctor hesitated for a moment in thought. "All right," he said. "What boat?" The lawyer told him and then asked with some surprise how he could manage to be away on such short notice, and if he had intended to take his vacation at that time. "I've been over eighteen times," said the doctor, with a genial smile, "and for the same reason that you have gone and are going. We'll work the boat together, you and I."—Arthur Goodrich in Leslie's Monthly Magazine.

**The First Anthracite Coal.**

When the first two tons of anthracite coal were taken into Philadelphia, in 1803, the good people of that city, so the records state, "tried to burn the stuff, but at length, disgusted, they broke it up and made a walk of it." Fourteen years later Colonel George Shoemaker sold eight or ten wagon loads of it in the same city, but warrants were soon issued for his arrest for taking money under false pretenses.

**Invaluable.**

"In what way could you be of any use to an employment bureau?" said the proprietor. "Simplest thing in the world," replied the shiftless looking applicant. "You are always in need of men to fill positions, and I'm always out of a job."

**A Step Too Far.**

"Author—it's a wise man who knows when he's well off."

"Friend—Yes."

"C. told me that everybody was talking about my new book."

"And what then?"

"I was foolish enough to ask what they said."

**Palliation.**

"We are going to give an amateur dramatic performance in aid of a worthy charity."

"Why, that, of course, is an extenuating circumstance."

"When you go in to collect a bill, the man at the counter is less apt to inquire about the health of your family than when you go in to pay one."

**Good tea must be grown under proper conditions**

LOW, damp or swampy lands in a warm, humid climate produce tea of rank, rapid growth, coarse in texture, woody fibred, rudely flavored—makes a cup heavy, murky in color, rough-tasting—it is poor tea.

But the Indian and Ceylon teas used to make the Red Rose brand are grown on the high lands of India and the mountain sides of Ceylon.

These teas are grown in clear dry sunshine, they mature slowly, the leaves of the Ceylon teas are tender, delicate, finely flavored, but not strong.

The Indian teas thus grown are full bodied, richly flavored, smooth in texture, strong.

Such Indian and Ceylon teas combined in Red Rose Tea produce a cup of a rich rosy brown, strong and smooth—all the richness and strength of Indian, all the delicacy and fragrance of Ceylon teas—that "rich, fruity flavor" which belongs alone to Red Tea—more qualities of tea excellence than any Indian or brand of Ceylon alone can possess.

**Red Rose Tea** is good Tea

St. John, N.B., Toronto, Winnipeg

**Acetylene Gas.**

Acetylene gas is now used as an explosive. By means of an air mixture a force is obtained from it which can compete with that of powder and dynamite. Carbide of calcium is reduced to small particles and put into a tin box. In this the carbide lies at the bottom and above it is a partition filled with water. After the drill hole has been completed the cartridge is placed in it and the hole is closed with a wooden stopper. Then the partition is perforated by a blow from a pin and the water comes in contact with the carbide, whereby acetylene gas is generated. This mixes with the air of the drill hole. After five minutes the gas is ignited by an electric spark.

**A Parisian Spectacle.**

M. Berteaux, the French minister of war, is a man of resource. It rained the other day in Paris with remorseless fury. There was an exhibition of fencing which drew all Paris, and when it was over the ladies found the street turned into a lake. How were they to cross? All the military men, especially the engineers, were non-plused. Then the minister had an inspiration. He sent some soldiers for chairs and a double line of these was made across the street like a pontoon. Each distracted dame took the hand of a soldier and was conveyed over, the spectacle affording much gratification to the rest of the company.

A young widow who is young, handsome and rich, seldom gets lonely.

**The YELLOWSTONE, NATIONAL PARK**

Is something absolutely unique in this world.

President Roosevelt.

The popular route to this delightful spot is via Union Pacific to Monida, thence by stage to all points in the park.

The stage ride from Monida, by the splendid Concord Coaches of the Monida & Yellowstone Stage Co., through scenery hardly inferior to the park itself.

Very low rates during June, July, August and September.

Inquire of

**F. B. ORATE, G. A.,**

125 Woodward Ave.,

DETROIT, MICH.

Give the devil his due, he thus said, very sharply.

What will become of me, then? she asked. You have no life insurance.
