SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-West Territories and in a portion of the Provinces of British Columbia, may be leased for a term of twenty-one years renewable for a further term of 21 years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five per cent.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, restricted by Chap. 27 of 4-5 George V. assented to 13th June, 1914.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

Have You Realised---

THE STARTLING FACT THAT—
one of the greatest leakages of NERVE FORCE is due to the constant overstraining of the muscles of the eyes.

One must remember that the eyes are like lenses of a STEREOSCOPIC CAMERA, and are in constant use for about SIXTEEN HOURS out of every TWENTY-FOUR.

Photographs or pictures are photographed daily by them; if therefore, there is the slightest defect in their shape, if they are not in perfect harmony with each other, or if wrongly fitted glasses are being worn, then there is serious danger. The muscles strive to remedy such defects, but this accommodation means an extra supply of energy every moment they are in use, and the NERVOUS SYSTEM is called upon to supply the demand.

If the eyes require more than can be supplied, or the energy supplied belongs to some other function of the body, then they must suffer in proportion to their loss, and other troubles quickly appear, such as:

Eye Ache, Head Ache, Pains Down the Back, Loss of Memory and Sleep, Giddiness, Biliousness, Palpitation of the Heart, and Various Nervous Troubles, depending largely upon the condition of the owner of the eyes.

There are over three million people totally blind in the United States. Many of them might have been in possession of their eyesight today had they commenced to use proper glasses at an early age. But there are many millions of people who are physical wrecks through the loss of their NERVOUS ENERGY; a large percentage of them could be relieved still if they would get fitted with proper glasses and thereby stop the leakage.

Those who value their eyesight and health will find out the exact state of their eyes without delay. Senseless people neglect them, foolish people refuse to take advice until too late.

We will give free examination of the eyes until further notice, and having bought out the entire stock of the Great Northwestern Optical Co. at bargain prices, we are in a position to give you the very lowest terms.
