## Why Can't We See It?

BY RUTH CAMERON.

The shoe clerk deftly slipped my foot into a pair of hygienic shoes and asked me to stand up and try them. I did so and was delighted at the perfect ease and comfort which I felt. But they were such hideous things with their big rounded toes and their flat heels! "Isn't it too bad they can't be pretty like the other shoes?" I said regretfully as I surveyed them. The shoe clerk smiled. "I think they are very much prettier," he said. "Why shouldn't they be? They follow the outline of the human foot. Now isn't the line of the normal human foot, as nature made it, far more beautiful than any shape that man has invented? What is there more beautiful about a pointed toe than a rounded toe? 'Curved is the line of beauty,' you know."

It's a perfectly good argument. Isn't it? And yet it only convinces the mind; it doesn't seem to convince the eye and the heart—at least of the average woman.

But isn't it too bad that we can't see it that way? Isn't it too bad that we can't realize that a woman dressed in a skirt cut with sufficient fullness to permit her the free use of her limbs, is a much more beautiful object than a woman hobbling awkwardly along with ridiculously hampered gait in a skirt which is a scant three-quarters of a yard around the hem?

And yet such is the peculiar blinding power of fashion that the average woman cannot help admiring the abnormal and inartistic if everybody is wearing it.

She may know that by all the canons of art it is ugly, but nevertheless it looks attractive to her.

Once in a while art and fashion happen to agree, and we have some mode which has really beauty in itself in addition to the lustre which fashion gives it. But this seldom lasts long, for freakish fashion soon exaggerates a beautiful style until it becomes unbecoming.

Of course we don't always realize how large a share fashion has in making a thing seem beautiful. We fancy we like it for itself, but let the fashion change and see how soon it grows ugly. Look at some picture you had taken ten years ago in a dress you thought most charming, and see how homely it looks to-day. Last summer you thought long sleeves hot and ugly; this year they will look very different to you, because they are going to be "the fashion."

Don't you wish there were some way to so educate our eyes that we might see fashions as they are and love the truly beautiful instead of the fashionable?

Perhaps after hearing this tirade you'd like to know what I did about the hygienic shoes. Well, then, being mentally convinced that they were the best thing, I bought them for walking; but being unconvinced in my heart, I also bought a smart pair of pumps to dress up in.

Red C

**Nature's Way Is The Best.**  
Buried deep in our American forest we find bloodroot, queen's root, man-drake and stone root, golden seal, Oregon grape root and cherrybark. Of these Dr. R. V. Pierce made a pure glyceric extract which has been favorably known for over forty years. He called it "Golden Medical Discovery."

This "Discovery" purifies the blood and tones up the stomach and the entire system in Nature's own way. It's just the tissue builder and tonic you require when recovering from a hard cold, grip, or pneumonia. No matter how strong the constitution the stomach is apt to be "out of kilter" at times; in consequence the blood is disordered, for the stomach is the laboratory for the constant manufacture of blood. Dr. Pierce's Golden Medical Discovery strengthens the stomach—puts it in shape to make pure, rich blood—helps the liver and kidneys to expel the poisons from the body. The weak, nervous, run-down, debilitated condition which so many people experience at this time of the year is usually the effect of poisons in the blood; it is often indicated by pimples or boils appearing on the skin, the face becomes thin—you feel "blue."

More than a week ago I was suffering with an awful cold in my head, throat, breast, and body," writes Mr. JAMES G. KENT, of 710 L. Street, S. E., Washington, D. C. "Some called it La Grippe, some pneumonia. I was advised by a friend to try a bottle of your 'Golden Medical Discovery.' I tried a bottle and it did me so much good that I feel safe in saying it is the greatest and best medicine that I ever took. My health is much better than it was before using your medicine. It does all you claim for it and is satisfactory."

**Household Notes.**  
Lace veils may be washed in a strong lather of white soap and lukewarm water. Let them soak 20 minutes, then squeeze the dirt out of them, and rinse in several waters. The final one should have bluing and just a dash of boiled starch to stiffen the lace.

Country housekeepers can dye articles in beautiful shades of green by drying and using the fresh and brown hickory from rocks, trees and fences. Boil the moss in water to more than cover it. Strain and put in the goods.

An excellent tea punch is made of a quart of freshly made tea and a cup of lemon juice, sweetened. Put this in a punch bowl with cracked ice and add tiny bits of pineapple, strawberries and slices of bananas, and serve.

To bleach handkerchiefs, add some slices of lemon to the water they are boiled in. Another method is to wash the handkerchiefs and then soak them over night in water with a little cream of tartar in it.

People who do their own butchering will find that the fawn-colored skin of a calf, properly tanned, will make a very pretty rug with a strong resemblance to doeklin.

A tiny emergency oven may be made of a large size biscuit tin with an asbestos plate in the bottom to prevent burning. Set the tin over an ordinary oil stove.

In hanging up a washing, be sure to put clothespins in where they will not leave a mark. Shirtwaists should be hung from the bottom and skirts from the belt.

Cereals with fruit make very economical luncheon desserts. The cereal should be moulded and smothered in fruit—either fresh or stewed in a syrup.

Beecham's salt will make rusty flatirons clear as glass. Rub the irons first with a wax rag; then scour with a paper or cloth sprinkled with salt. Tulle veils that have become limp may be pressed with a warm iron, being careful to put a layer of thin muslin between the tulle and the iron.

Orange salad is made of the sections of the peeled oranges, mixed with sliced celery and broken nut meats. Serve on lettuce with mayonnaise.

Some people like their potatoes to have the additional flavor given by a pinch of sugar added (as well as salt) to the water-while boiling.

## "Clean-Up" Day Abused.

Editor Evening Telegram.

Dear Sir,—I fully coincide in every particular with your short, concise and pointed article in last evening's issue about "Clean Up Day." The idea of such a day solely belongs to Councilor Coaker, for which thousands of citizens are grateful. But as in every new innovation there are some among us who take mean advantages and therefore abuse and totally destroy the main object. I believe the sole object of Councilor Coaker when introducing this idea was the cleanliness of the city, especially the congested districts, and to help those of our citizens who cannot help themselves in respect of hiring of horses and carts for the removal of all garbage remaining in backyards after the winter.

But what do we find each season when "Clean-Up Day" comes around? Heaps of debris along the principal streets of our city opposite the residences of wealthy citizens. Professional men, M. H. A.'s, Legislative Councilors, and officials, who can well afford to pay to have such rubbish removed. Hence I say the promoter and his fellow councillors erred in making this grand innovation — "Clean Up Day"—general through the city. The idea, for example, of the wealthy residents of Cochrane Street, etc., putting themselves on a level with the poor class of tenants of Dammerill's Lane and Notre Dame Street, and expecting the Council's employees and horses to remove their heaps away is to my mind mean and contemptible in the extreme.

To my mind Councilor Coaker should move a resolution at the next meeting, that in future "Clean-Up Day" would be "solely" devoted in the interest of all residents of congested districts such as the one above named; this will give the sanitary staff ample time to remove all rubbish from these places within two days, for as it now appears, judging from the immense piles along some of our principal streets and opposite palatial residences, the work of removal will take at least a week.

Hence, as your article suggests, the proverbial "geem" will be given full time to increase and multiply. Bad as it is the condition of our city today owing to "Clean Up Day," our sanitary inspectors should be more attentive to their duties especially for the next few days. I refer now particularly to Cochrane Street where I noticed a number of small boys on Tuesday morning removing from dumped garbage several articles of wearing apparel, such as old shirts, pants, stockings, hats, caps, besides floor canvas, empty bottles, jam crocks tomato cans, and dirty old and offensive chocolate boxes. Inspectors should not allow children to remove such articles at any cost.

Yours truly,

May 14, 1913. **HEALTH.**

**\$5,000,000 Damage**

To Property in British Isles in Three Months by Suffragettes.

London, May 8.—The damage to property in the British Isles caused by the Militant Suffragettes during the past three months amounts to upwards of \$5,000,000, according to an estimate made by the authorities at police headquarters in Scotland Yard. To this sum must be added the increased cost of protecting lives and property.

Three detectives have been assigned to watch over each member of the cabinet at all times, while suspected persons are shadowed by plain clothes men and all public buildings have been placed under special guard.

Before using cake tins, rub them well with lard and heat them in the oven. This prevents them from rusting after they are washed.
