GENERAL MOTORS.

Since the last advertisement was written on Saturday, this issue dropped off almost a full point, and now, as the expected recession has taken place, believing the worst has been discounted, we say that General Motors is again a purchase, even with the possibility of a dividend decrease which can only be 12 cents per share. Motors may sell lower but it is risky to wait for a lower figure as \$8.50 makes it a good buy right now. Traded on margin \$3.00 per share.
