AND INVESTMENT SOCIETY.

The rest of the market continues rather uncertain, the wide fluctuation in grain having the effect apparently of restricting trade. The market looks rather "spotty," and it seems to be the general trend of conservative opinion that people who have profits on the long side will do just as well to take them. Sales to poon 360 000. At 4% payable half-yearly are a first-class security at the highest that people who have profits on the long side will do just as well to take them. Sales to hoon, 360,000.
