**PUT YOUR NOTICES OF CONTRACTS TO BE LET
WHERE THEY BRING RESULTS**

Unless you place your proposition before the largest possible number of contractors you will not have the advantage of competition and its consequent saving on contracts.

The contractors of Canada look to the

CANADIAN ENGINEER

for the announcements of proposed work. This clientele cannot be duplicated in any other Canadian Engineering Journal.

Therefore your notices to be resultful should without doubt be inserted in the Canadian Engineer. A moderate outlay in advertising such proposals will be convincing proof of this. When you next have the placing of them do not forget that the Canadian Engineer carries more of this very class of advertising than any other Canadian Engineering Journal.
