DEAR SIRS.—We have used your Crown Boiler Compound for three months, and are glad to inform you that we find it fully comes up to your claims for it.

We have used various other compounds, but the most they did was to prevent the scale from adhering to the tubes, etc., and it had to be taken out bodily. With yours, we find it dissolves the scale, which comes away through the blow off as mud. Our engineer reports the result as most satisfactory, and we have instructed him to use it in our establishment till further orders.

Kindly send in another barrel at your earliest convenience and oblige.

Yours truly,
(Signed) CHRISTIE, BROWN & Co., Limited.
Per R. Hawry, Manager.

TORONTO, June 9th, 1900.

MESSRS. C. K. JOHNSTON & CO., City

GENTLEMEN.—We have now been using your "Crown Boiler Compound" for a year and can truthfully say it is the best we have ever used. Our engineer reports that our boilers are kept in first-class condition without any scraping or other mechanical cleaning, and with no injury whatever, as far as he can discern, to the joints, packing, or any part of the boiler or engine.

We consider the iron package in which it is supplied an excellent idea, as it prevents waste through evaporation or leakage, besides being convenient and ornamental.

Yours truly,
(Signed) CHRISTIE, BROWN & Co., Limited.
Per R. Hawry, Manager.

And the following, many of whom have given us strong testimonials, the only one allowed to go from their respective establishments:—Gendron Mfg. Co., John Abell Engine & Machine Works Co., A. R. Williams Machinery Co., Wm. & J. G. Greay, Dominion Radiator Co., Toronto Carpet Mfg. Co., H. McLaughlan & Co., Canada Cycle and Motor Co., Aug. Newell & Co., Octavius McCormack & Co., Standard Silver Co., Hungerford Smith & Co., Menzie-Turner, etc., etc., all of Toronto, Hamilton Steel & Iron Co., Hamilton Water Works Co., of Hamilton, Ont.
